

How To Drive Game Modes

Following the fine tradition of the games that came before it, *Mario Kart 8* has a robust selection of single-player and multiplayer game modes for kart racing fans to test their skills on the track with their favorite Nintendo characters!

Grand Prix

Eight cups, four tracks each, absolute chaos. *Mario Kart 8*'s **Grand Prix** pits twelve racers against each other in some of the wildest kart racing yet! Winning the cups and collecting Coins while racing can unlock new racers and new parts for your vehicles.

Time Trial

It's just you, the track, and the clock in **Time Trial** mode! Complete three laps on a track as fast as possible, collecting Coins to reach maximum speed while taking the fastest racing lines possible.

Battle Mode

Ten race courses picked from the eight cups become **Battle Mode** maps. Racers must gather **items** to attack their rivals and pop their balloons, all while doing their best to defend themselves!

VS Race

Race the way you want to, turn off **items** you don't want to deal with, and set up your own cup to race the COM or your friends!

Multiplayer

Play offline with up to four friends on one Wii U in split-screen multiplayer, or play online, alone or with a buddy, against the fiercest competition possible: other players from around the world.

How To Drive Drivers Manual

Mario Kart 8 offers racers multiple ways to control the action. Choose the method you are most comfortable with and go!

GamePad

*Not Pictured: B Button for Braking

Classic Controller Pro

*Not Pictured: B Button for Braking

Wii Remote

On Tilt Controls

Tilt controls replicate the experience of using a steering wheel to tackle the craziness of Mario Kart 8. Wii Remote users can attach the Wii Wheel to their controller to help them hold onto the controller while using this control method. It can take some getting used to, but with enough practice you'll be able to keep up with the competition!

Driving Techniques

There are a number of special techniques outside of "Keep Accelerating, Steer As Necessary" that are essential to success in Mario Kart 8.

Rocket Start

Timing a perfect Rocket Start can determine the whole nature of a **Grand Prix** race's first lap, and this technique is essential for posting record-breaking Time Trials. When Lakitu begins the countdown, start accelerating when "2" is on screen and the second light is lit. If this is well timed, you'll have a perfect Rocket Start.

Braking

Braking is under-appreciated! If it seems like you're about to go out of control and hit a wall or an obstacle on the track, by tapping the brakes you can regain some maneuverability to get away from danger—at the cost of speed.

Jump

The drift button doubles as a jump button. Jumping won't take you over **items** on the road, but it can lift you over small gaps in the road. You can cut corners that overlook bottomless pits this way, but it can be quite risky to try.

Drift

By holding down the drift button as you enter a turn, your vehicle will start to drift, locked into that turn. You can adjust the angle of your drift by steering to the left or right. The sharper your turn is while drifting, the faster you'll build up blue sparks, and eventually orange sparks, to set off a Mini-Turbo or Super Mini-Turbo! Note that the various vehicle chassis heavily affect how you drift.

Mini-Turbos and Super Mini-Turbos

When you see large blue sparks coming off your back **tires** during a drift, release the drift button to perform a Mini-Turbo. This will give you a short speed boost that can help you exit your drifts even faster. However, if you hold on to the sparks until they turn orange, you'll be able to perform a Super Mini-Turbo, which provides a longer lasting speed boost.

Jump Boost

By jumping just as you hit a ramp of some kind, you'll perform a Jump Boost, which will give a short burst of speed. You can determine the trick your racer executes by pressing a direction on your analog stick or control pad. There are lots of things on every race course that you can Jump Boost off of, even if it doesn't look obvious. Experiment as much as you can!

Drafting

If you stick behind a racer for a short period of time, you'll gain a significant burst of speed by riding their slipstream. Drafting can be tough to pull off, as most racers will simply not let you stay behind them without a fight. Make sure you don't accidentally run into any **items** a rival might be trailing when trying to draft behind them!

Ramming

There's no special button to press when you want to ram an opponent—just steer into them! Heavyweight racers can typically run any other racer off the track with a few good bumps. But with enough speed, even the lightest racer is able to push aside heavier rivals.

Spin Boost

While driving on antigravity portions of a track, ramming racers will reward you with a Spin Boost. The increase in speed does come at a cost: steering can be a challenge while caught in a Spin Boost. You can also trigger a Spin Boost by driving into a Spin Boost pillar.

Spin Turn

A technique mostly reserved for **Battle Mode**, if you come to a complete stop and then hold Brake and Accelerate, you can turn in place quickly. This is a good way to reverse direction to try and ambush racers that you know are closing in. But you should never really have need to Spin Turn during a standard race, unless you have no other way around an obstacle you're stuck against.

U-Turn

The U-Turn is a special technique allowed only in **Battle Mode**! To U-Turn, commence a drift. While you drift, let go of the Accelerate button to whip your racer around to face anyone closing in from behind. This move will allow you to stay mobile, and allows you to better aim any ranged **items** you have rather than blindly firing them behind you and hoping for the best.

How To Drive Terrain

Courses in *Mario Kart 8* have a variety of terrains that you'll drive over (or fly over) during the course of a race. These all affect your vehicle performance somehow, so it's important to know about them, and know how best to handle them.

Road

The main roads of any course are where you will traditionally get the best performance out of your chosen kart or bike. Road surfaces allow for drifting and Mini-Turbos, and are often where the action is.

It should be noted that not all roads are equal! Courses such as Sherbet Land take place in icy and snowy environments, and your overall handling will reflect this!

Antigravity Roads

New to *Mario Kart 8* are antigravity roads and antigravity panels. When a course begins to twist into strange angles and shapes, typically an antigravity panel will be there to trigger your vehicle's special drive system that will let you stick to any surface, even if it's upside down. Antigravity roads change your handling quite a bit. Your turns will seem floaty and be less sharp, and your momentum carries more through your drifts, which can make your turn exits wider.

Off-Road

Off-road portions of a course, broadly speaking, are any parts of the course that are not the main track. For example, this can be grass, rough sand, or deep snow. Most of the time, you don't want to be off road. Even when you maximize a vehicle's potential off-road performance, you lose too much speed crossing these parts of a course. You can't drift while off road, or even come close to your max speed, unless you're flying over the rough terrain with a Mushroom or Super Star.

Water

Some courses will send you into the water as part of the race, and in these sections you'll have to adjust for more sluggish handling. Your turns will not be as sharp as usual. Some courses featuring water will also have multiple instances where you jump out of the water and dive right back in, costing you some speed in both cases.

Interestingly, taller karts will often go on two wheels more easily during drifts underwater, which can help you in cutting corners as tightly as possible.

Air

Flying through the air is accomplished with glider parts that make up your vehicle. Before a flight, you're typically launched from dash panels and glide ramps. Depending on the course, you will either be sent flying "on rails" to the next section, or you will have complete control of your flight in order to determine how and where you land. Some shortcuts require you to make maximum use out of a flight in order to bypass rough terrain.

How To Drive Trackside Assistance

Every course features specialized panels or obstacles that actually help boost your speed, or assist in overtaking, attacking, and defending yourself against other racers.

Dash Panels

Dash panels help send you flying across the course at high speed. Occasionally, you'll find dash panels on ramps to help extend how far you go from the ramp. In some cases, the dash panels are on moving platforms and might require you to do some fancy driving in order to hit them. Ironically, sometimes taking a route indicated by dash panels is not the fastest route through a track.

Ramps

Ramps are either very obvious constructs placed on sections of a course, or they can be seemingly innocuous parts of the environment, like the crests of hills formed by a track being rocked by shockwaves or pipes laying lengthwise across the ground. You can Jump Boost off a ramp for extra speed.

Glide Ramps

A glide ramp will always be found before any mandatory gliding sections of a course, but some shortcuts in the game are only possible due to glide ramps placed off the beaten path. Gliding can help you bypass more complex parts of a course, or avoid obstacles and off-road sections.

Antigravity Panels

Antigravity panels are found before the crazier sections of a course, but they also help enable alternate routes. Remember that the handling of your vehicle changes when under the effects of antigravity, so be prepared to compensate for that.

Spin Boost Pillars

Found on antigravity roads, these pillars provide the same Spin Boost you get when making contact with another racer on these sections of a track. However, you lose some control of your vehicle while enjoying the boost provided by a Spin Boost pillar. Spin Boost pillars don't share the same appearance across all the tracks they appear on, but they all do the same thing.

Coins

Coins are spread out throughout every course in *Mario Kart 8*. Collecting a Coin provides a boost to your maximum top speed. At ten Coins, you reach your maximum potential speed. Just because you've hit the ten Coin cap doesn't mean you shouldn't pick up more during a **Grand Prix** race. You not only want Coins for yourself—you want to deny them to your rivals! However, during a **Time Trial**, you don't want to go out of your way to collect Coins once you've reached the maximum. Concentrating on a good racing line is more important.

Coins regenerate on a course after a short time in most **game modes**. However, in Time Trials Coins do NOT regenerate after being collected.

Item Boxes

Appearing in all **game modes** outside of Time Trials, Item Boxes contain your primary offense and defense against other racers on the track. Like with Coins, you not only want Item Boxes for yourself, you also want to deny your enemies a chance at **items**. As with Coins, Item Boxes regenerate after a short period of time.

How To Drive Items

Items are your primary means of offense and defense on the track. Using an item is as simple as tapping the item button on your chosen controller. Racers that are hit by items (or course hazards) will have three Coins knocked away from them onto the track, which adds to the inconvenience of getting hit by limiting their top speed.

There are two distinct types of items that are handled in different ways.

Equipable Items

Equipable items are items that, when you hold down the item button or tap it once, appear behind or around your racer. You can use these items to protect yourself from incoming attacks to the rear, attack racers in front of you, fire at racers closing in from behind, or leave on the track as traps.

Items that are held behind your racer require you to hold down the item button to keep it placed there. Don't forget this, as it is a cornerstone to defending yourself in a race!

Banana

One of the most common defensive items available, Bananas cause racers to spin out if they make contact with them. You can drop it behind you, or toss it far out in front of you. However, one of the best uses of a Banana is to hold on to it, dragging it behind your racer to absorb incoming attacks. It will only absorb one strike, and can't stop things like the Spiny Shell or Boomerang, but it can be a clutch defense to break out and keep the lead with!

Tossing a Banana forward requires you to hold up on your analog stick or control pad while tapping the item button. Simply tapping the item button, or releasing it after being held, will drop the item behind you.

Triple Bananas

Once you tap the item button, the Triple Banana surrounds your racer with a rotating barrier of three Bananas. You can throw these Bananas forward or leave them behind you. Your defense from attacks via shells is less sound, especially when you have only one or two Bananas orbiting your racer, but the Triple Banana makes a great enhancement to any ramming attacks you try out!

Green Shell

The Green Shell fires straight forward when you hit the item button, or backwards if you hold down on the analog stick or control pad. As with the Banana, you can hold the Green Shell behind you to defend against attacks from behind, or clip racers with it as you pass them up.

What makes the Green Shell so awesome (and frustrating) is that when you fire it, if you miss your intended victim, it can bounce off walls for quite some time before it eventually breaks. A bouncing Green Shell will ALWAYS seem to bounce at you at all the wrong moments, but you'll also feel smooth as heck when you score a perfect bank shot off a wall to hit the first-place driver just before the finish, and take the lead for the win as a result.

Triple Green Shells

Similar to Triple Bananas, Triple Green Shells will orbit your racer once you trigger the item, providing defense and offense simultaneously, with the same disadvantages shared between them as you work through the arsenal. The biggest threat with three Green Shells is that you can clog up a section of a course with three bouncing hazards.

Red Shell

Red Shells can be fired forwards and backwards, just like a Green Shell, and they can be used for defense in the same manner. A big difference is that Red Shells do not bounce off walls—they shatter immediately. The other big difference is that they will home in on the nearest target in front of the racer that fired it. Red Shells will pursue a racer almost anywhere, so always keep in mind this potential threat, and save some items to defend yourself with!

Triple Red Shells

Triple Red Shells provide the same defensive benefits as the Triple Green Shells, but in terms of offense you want to be more deliberate on how you use them. Don't fire them all at once at a target! Fire them steadily, one at a time, making sure you clear any defensive items your opponent might have before your second or third shell strikes home!

Bob-omb

Just like other equipable items, you can hold on to the highly explosive Bob-omb, or toss it far forward like you would a Banana. Unlike a Banana, the Bob-omb has a slightly larger effect radius. On contact with a racer, or after its short fuse is burned out, the Bob-omb goes off with a colossal explosion. Racers hit directly by the Bob-omb will be sent flying upwards, while those who touch the blast before it fades will spin out. One cruel trick is to drag the bomb behind you, drift in front of a racer, and Mini-Turbo away just as you drop the bomb in their face!

Crazy 8

The Crazy 8 provides eight items in an orbit around you: a Green Shell, Red Shell, Banana, Mushroom, Bob-omb, Blooper, Super Star, and Coin. You can ruin the days of many racers before you're through with a Crazy 8! The item that is used when you tap the item button will be the one that is at the front of your racer, so pay attention in order to use the item you want to use!

Be careful when you have the Crazy 8 equipped! Getting hit will cause you to drop all of your remaining items onto the track for others to collect. Additionally, the Bob-omb you carry can be triggered by items on the track or other racers while it spins around you. We recommend you get rid of it ASAP, especially if you're in the middle of the pack!

Tactical Items

Tactical items are items that you can't equip for defense. Once you use them, they last until their effects wear off, and that is that. As such, you need to time the use of these items well, as they can greatly affect the outcome of a race!

Mushroom

A Mushroom provides a powerful, lengthy speed boost when you press the item button. You're going so fast with a Mushroom, rough **terral** doesn't slow you down, and at the peak of the boost, you can shove aside any racer, regardless of their weight class compared to yours! Some of the best shortcuts in the game require you to make use of a Mushroom as well.

Mushrooms are also one of the ways you can escape a Spiny Shell. Drawing upon reserves of mana, luck, and perfect timing, if you fire off a Mushroom just as the Spiny Shell is about to land on you, you can escape, just barely ahead of the shell's detonation!

Triple Mushrooms

Instead of one Mushroom, you get three. The effects are the same with each Mushroom used. If you need to use them to catch up with a rival, it's best to not fire them rapidly, and instead let the boost from one start to subside before triggering the next.

The Triple Mushroom is notable for being the one item you get during Time Trials. In this game mode, you must use the Triple Mushroom wisely if you want to break records.

Golden Mushroom

The Golden Mushroom is a rare item that you'll likely see in situations where you're near the back of the pack. Like its standard cousins, the Golden Mushroom boosts you forward at a high rate of speed. However, until the item finally fades away on its own, you can boost as many times as you want! Just make sure you don't fly into a bottomless pit or crash into any items while boosting.

Coins

The Coin item allows you to add two Coins to your total. There are no defensive or offensive properties to this item whatsoever, but it can be useful if you're struggling to keep the Coins you're collecting off the track during an intense race!

Bullet Bill

If you're far enough behind, there's a chance that you can get a Bullet Bill item. This temporarily morphs your racer into—**rough** you guessed it, a Bullet Bill, and launches you down the track at a high rate of speed. You don't even have to worry about turning—this power-up will handle it for you! Any rivals unfortunate enough to be in your way will be rammed aside effortlessly.

Blooper

Using a Blooper will send one of these squid-like creatures to the track. After a short delay, the Blooper will spray ink all over **the racers**, obscuring their vision. This sudden loss of sight can cause some very unfortunate accidents, with racers running into threats they'd normally avoid with ease. The ink fades on its own, but if you use any Mushroom, or use a dash panel, or drive into a **body** of water, the ink will be stripped away so you can see again.

Boomerang Flower

New to Mario Kart 8, the Boomerang Flower grants you a powerful ranged weapon that you can throw forwards or backwards like a shell. The big difference is that the Boomerang will return to you twice, assuming it doesn't hit anything that destroys it before it comes back. You can hit enemies with the Boomerang twice in one toss: once on the way out and a second time on the way back.

The Fire Flower grants you the temporary ability to throw fireballs at your enemies. You can fire them forwards or backwards, and they move fast enough that you don't have to lead a target too much to hit them. Better yet, you can bank shot the fireballs off walls and other obstacles to hit rival racers! Unfortunately, the fireballs do have a limited range compared to any shell, and will fizzle out after a few seconds.

Piranha Plant

Acting both as a speed increase and a weapon, the potted Piranha Plant bites at any items and racers in its path, even chomping down on Coins to add them to your total! With every bite, you get a small speed boost. The plant will attack anything it can reach without your prompting, but you can also hold down your item button to make the plant bite constantly for a steadier boost in speed.

Super Horn

The rare Super Horn is one of the few items in the game that can outright stop a Spiny Shell from striking a race-ruining blow! Only capable of one blast, the Super Horn emits a very short range shockwave all around you, blasting away any items that might be close to you, including those relentless Spiny Shells. Racers caught in range will also spin out. If you manage to get yourself a Super Horn and are in the lead, hold on to that horn for as long as you can! There's always a Spiny Shell with your name on it.

Super Star

Super Stars tend to be granted to players near the back of the race pack. Using one gives you a short window of greatly increased speed, and total invincibility to anything on the track! Anyone who touches you will spin out and lose Coins, and thanks to your increased speed even going off road will hardly slow you down.

Lightning

This portable lightning bolt strikes every other racer on the course with a shrinking blast of electricity. The effects of being struck eventually wear off, but the user of this item can gain a few spots easily. Note that the higher in the ranks a racer is, the longer the Lightning effect will last.

If you've been struck by Lightning, don't get run over by other racers, as recovering from getting flattened takes time, costs you a lot of speed, and might even cost you the race!

Spiny Shell

Responsible for sundered friendships and broken dreams of first place, the Spiny Shell has returned to once again be the bane of the front runner! Once fired, a Spiny Shell streaks along the ground, battling aside anyone or anything unlucky to be in its way as it seeks out the first-place racer. The big difference is that the Spiny Shell will return to you twice, assuming it doesn't hit anything that destroys it before it comes back. You can hit enemies with the Spiny Shell twice in one toss: once on the way out and a second time on the way back.

The Spiny Shell, as problematic as it is, CAN be beaten! A well-timed Mushroom can send you out of harm's way as the shell begins its terminal dive. The Super Star shrugs off the blue menace. The Super Horn can shatter the Spiny Shell if it's in range. However, if you do not have any items, your only other option is to fall back to second place. If you do that early enough, the Spiny Shell will aim for the new first-place racer and ignore you!

Tip

You Were Hit By An Item! Watch Your Item Indicator!

Item indicators will appear at the bottom of your screen to warn you of incoming Red Shells, Spiny Shells, and Super Star or Bullet Bill-enhanced racers. If you're playing with the GamePad, your map of the course also shows more than just a map and the current standings of the race. Next to each racer on the list is a small icon that shows you what item they have, or if they just collected an Item Box and are in the middle of the item roulette. Use this information to prepare a proper response to the danger!

Item Roulette

When you first hit an Item Box, a roulette begins. You might be convinced that you can time pressing the item button to get a specific item you want, but that's not the case. The item you get is primarily determined by what position you are in. Each item that you can get has a certain percentage chance that it will be what the roulette awards you. However, some items you simply can't get while in certain places. First place isn't going to get a Bullet Bill or Spiny Shell any time soon, while a racer in last place will see a greater chance at picking up those items. While it might be luck that you get a certain item, using what you have skillfully is what separates the newer Mario Kart player from the more experienced racers!

Item Probabilities

The following charts show the likelihood of getting specific items for both players and COM racers in **Grand Prix** and **Battle Mode**. In VS. Race, you can select special item settings that change what will be available.

Note

Your item probability is affected by the rank you are in when you hit the Item Box. You can hit an Item Box in first place, but if you fall back to fifth, you're still rolling for the item as though you were in first!

An exciting feature in *Mario Kart 8* is the ability to edit your highlights from races, and then share them with others on the [Miiverse](#). It's one thing to brag about an unlikely series of events that earned you first place. It's another to have other players see it!

After every race, you are given the option to view the highlights of the race in a short 30-second segment showing off big moments that occurred throughout the whole event. You can save up to six race replays as your Favorites for later viewing in *Mario Kart TV*.

In *Mario Kart TV*, you can go into the saved race replay, and heavily modify how the highlight reel plays. You're able to select up to four racers for the dynamic camera to switch between, as well as choose what types of events you want the highlight reel to focus on, how long the reel lasts, and how much of the in-game sound you want to have playing throughout the reel. When you're done with your editing, you can share your work with the whole world!

In addition to your own highlights, *Mario Kart TV* will use your internet connection to populate the Global: Popular and Global: Recent highlight reel sections with information drawn from [Miiverse](#) activity.

The Wii U Miiverse works hand-in-hand with *Mario Kart 8*, allowing players many options to show off their best times, best races, and craziest moments, while also allowing them to study what the best of the best are doing differently. It's more than just making posts from the main menu!

- • Share highlight reels immediately after every offline match (after choosing to view the highlights).
- • Post Time Trials ghost data to Miiverse (prompted whenever you set a new record), and view posts from other racers through the in-game Online Ghosts menu. Compete against your own ghost and the ghosts from the fastest racers across the globe!
- • Create Miiverse communities by setting up online Tournaments.
- • View player Miiverse profiles through the Friends menu, and view the Tournament Miiverse communities through the Tournament Join screen.

The Racers and Rides The Racers

Mario Kart 8 has the largest cast in the history of the franchise. Racers from the length and breadth of the entire Mario universe in its starting roster and the diverse cast of unlockable racers earned by playing through the **Grand Prix** mode allow players an enormous variety of potential drivers for the equally diverse customizable kart and bike line-up.

Racers in *Mario Kart 8* are divided into five categories: Featherweight, Light, Medium, Heavy, and Cruiser. These weight classes are one of the key determining factors in kart and bike performance, influencing how you take and dish out contact with other racers, how well you drift, how much you benefit from drifting, how powerful your **Mini-Turbos** are, and how well you recover from getting struck by **items**. As a general rule, lighter-weight racers tend to have great acceleration and cornering, but suffer from lower top speeds and a tendency to get pushed around with great ease by heavier racers. The heavier racers have the highest top speeds in the game, but have issues with cornering, and their acceleration is very poor. Of course, a heavy racer can easily shove aside any smaller and lighter opponent!

Your choice of racer definitely has an effect on how well you can race, but personal preferences figure in heavily for **Grand Prix** racing. However, when it comes to Time Trials, your choice of racers becomes narrower, as you attempt to optimize your chances at breaking speed records.

These racers are available when you first fire up your copy of *Mario Kart 8*. They are spread out across the five weight classes, giving players an excellent spread of potential drivers to choose from.

Mario

Weight Class: Medium

Mario sets the example for all Medium-class racers. While the stats say he doesn't excel in any given category, it also means his weaknesses are not particularly harmful. Like all Medium-class racers, you can make up for his deficiencies quite easily with the right parts!

• Weight: 6	• Speed (Land): 6	• Handling (Land): 4
• Acceleration: 2	• Speed (Sea): 6	• Handling (Sea): 4
• Grip: 2	• Speed (Flying): 6	• Handling (Flying): 4
• Mini-Turbo: 2	• Speed (Weight): 6	• Handling (Weight): 4

Luigi

Weight Class: Medium

Luigi is just like his brother, a good middle-of-the-road racer that any player can learn to use effectively. His reputed cowardice doesn't seem to faze him on the track!

• Weight: 6	• Speed (Land): 6	• Handling (Land): 4
• Acceleration: 2	• Speed (Sea): 6	• Handling (Sea): 4
• Grip: 2	• Speed (Flying): 6	• Handling (Flying): 4
• Mini-Turbo: 2	• Speed (Weight): 6	• Handling (Weight): 4

Peach

Weight Class: Light

Taking time out of her busy schedule of stomping Koopas and saving the Sprixie Kingdom, Peach roars back to the racetrack! She's a bit faster than many other lightweight racers, but it takes her a bit longer to get up to speed.

• Weight: 4	• Speed (Land): 4	• Handling (Land): 6
• Acceleration: 3	• Speed (Sea): 4	• Handling (Sea): 6
• Grip: 3	• Speed (Flying): 4	• Handling (Flying): 6
• Mini-Turbo: 3	• Speed (Weight): 4	• Handling (Weight): 6

Daisy

Weight Class: Light

"HI, I'M DAISY!" The exuberant princess from another land is back on the track! She's a match for Peach and Yoshi in terms of stats, but there's probably no other racer on the track who's as happy to be on the starting grid as she is.

• Weight: 4	• Speed (Land): 4	• Handling (Land): 6
• Acceleration: 3	• Speed (Sea): 4	• Handling (Sea): 6
• Grip: 3	• Speed (Flying): 4	• Handling (Flying): 6
• Mini-Turbo: 3	• Speed (Weight): 4	• Handling (Weight): 6

Yoshi

Weight Class: Light

Yoshi represents his island well in *Mario Kart 8*, as a member of the heavier group of lightweight. Fortunately for everyone else on the track, Yoshi doesn't bring out his egg arsenal to the races!

• Weight: 4	• Speed (Land): 4	• Handling (Land): 6
• Acceleration: 3	• Speed (Sea): 4	• Handling (Sea): 6
• Grip: 3	• Speed (Flying): 4	• Handling (Flying): 6
• Mini-Turbo: 3	• Speed (Weight): 4	• Handling (Weight): 6

Toad

Weight Class: Light

Being a loyal retainer to Princess Peach isn't enough to stop Toad from being extremely competitive on the track. Small even for a lightweight, Toad can squeeze his way into and out of situations that would trip up larger racers!

• Weight: 2	• Speed (Land): 2	• Handling (Land): 8
• Acceleration: 4	• Speed (Sea): 2	• Handling (Sea): 8
• Grip: 4	• Speed (Flying): 2	• Handling (Flying): 8
• Mini-Turbo: 4	• Speed (Weight): 2	• Handling (Weight): 8

Koopa

Weight Class: Light

The faithful and ever stompable frontline troopa represents his shelled brothers on the track—and if the Koopa's lucky, maybe Bowser won't be upset about it!

• Weight: 2	• Speed (Land): 2	• Handling (Land): 8
• Acceleration: 4	• Speed (Sea): 2	• Handling (Sea): 8
• Grip: 4	• Speed (Flying): 2	• Handling (Flying): 8
• Mini-Turbo: 4	• Speed (Weight): 2	• Handling (Weight): 8

Shy Guy

Weight Class: Light

Years have gone by, and still nobody knows what the Shy Guy looks like behind the mask. This tame, though somewhat shy, racing driver isn't as willing to hide his skills on the track!

• Weight: 2	• Speed (Land): 2	• Handling (Land): 8
• Acceleration: 4	• Speed (Sea): 2	• Handling (Sea): 8
• Grip: 4	• Speed (Flying): 2	• Handling (Flying): 8
• Mini-Turbo: 4	• Speed (Weight): 2	• Handling (Weight): 8

Baby Mario

Weight Class: Featherweight

Ask not why Baby Mario is on the track at the same time as Mario—ask yourself if you can beat his super-high acceleration out of every turn. Featherweights like Baby Mario have a serious disadvantage getting caught in the middle of a pack, as they can be easy to push around.

• Weight: 0	• Speed (Land): 0	• Handling (Land): 10
• Acceleration: 5	• Speed (Sea): 0	• Handling (Sea): 10
• Grip: 5	• Speed (Flying): 0	• Handling (Flying): 10
• Mini-Turbo: 5	• Speed (Weight): 0	• Handling (Weight): 10

Baby Luigi

Weight Class: Featherweight

Baby Luigi shows no fear on the track, which makes one wonder why he becomes so easily frightened later in life...

• Weight: 0	• Speed (Land): 0	• Handling (Land): 10
• Acceleration: 5	• Speed (Sea): 0	• Handling (Sea): 10
• Grip: 5	• Speed (Flying): 0	• Handling (Flying): 10
• Mini-Turbo: 5	• Speed (Weight): 0	• Handling (Weight): 10

Baby Peach

Weight Class: Featherweight

The regal royal infant, Baby Peach showed interest in kart racing well before Bowser-led kidnappings became a part of her daily routine.

• Weight: 0	• Speed (Land): 0	• Handling (Land): 10
• Acceleration: 5	• Speed (Sea): 0	• Handling (Sea): 10
• Grip: 5	• Speed (Flying): 0	• Handling (Flying): 10
• Mini-Turbo: 5	• Speed (Weight): 0	• Handling (Weight): 10

Bowser

Weight Class: Cruiser

Could the king of all Koopas be anything less than the heaviest racer on the course? Of course not. Cruisers like Bowser easily punch aside any lighter racers without breaking a sweat, though they also have to contend with having a tough time in the corners, along with some abysmal acceleration.

• Weight: 10	• Speed (Land): 10	• Handling (Land): 0
• Acceleration: 0	• Speed (Sea): 10	• Handling (Sea): 0
• Grip: 0	• Speed (Flying): 10	• Handling (Flying): 0
• Mini-Turbo: 0	• Speed (Weight): 10	• Handling (Weight): 0

Donkey Kong

Weight Class: Heavy

The first member of the DK crew returns to the track after dealing with a pesky invasion of his home island by some cold-hearted northerners. Among the "light" Heavy racers, Donkey Kong isn't the absolute fastest, but he's not as slow to get up to speed, and is a little better in the corners.

• Weight: 8	• Speed (Land): 8	• Handling (Land): 2
• Acceleration: 1	• Speed (Sea): 8	• Handling (Sea): 2
• Grip: 1	• Speed (Flying): 8	• Handling (Flying): 2
• Mini-Turbo: 1	• Speed (Weight): 8	• Handling (Weight): 2

Wario

Weight Class: Cruiser

Wario's desire for more gold and more treasure has brought him back to the track. One of the heaviest and fastest racers in the whole cast, expect to see many records set by players choosing Wario!

• Weight: 10	• Speed (Land): 10	• Handling (Land): 0
• Acceleration: 0	• Speed (Sea): 10	• Handling (Sea): 0
• Grip: 0	• Speed (Flying): 10	• Handling (Flying): 0
• Mini-Turbo: 0	• Speed (Weight): 10	• Handling (Weight): 0

Waluigi

Weight Class: Heavy

It's always Waluigi time.

• Weight: 8	• Speed (Land): 8	• Handling (Land): 2
• Acceleration: 1	• Speed (Sea): 8	• Handling (Sea): 2
• Grip: 1	• Speed (Flying): 8	• Handling (Flying): 2
• Mini-Turbo: 1	• Speed (Weight): 8	• Handling (Weight): 2

Mario Kart 8's list of unlockable racers is enormous, with fourteen additions to the roster for players to reveal! Unlocking them is a matter of completing a cup for the first time, in first place, on a given speed class. You can't just run **Mushroom Cup** on 50ccc until you have all fourteen racers unlocked. The order of unlocking is randomized, except for the eighth unlock, which will always be your Mii.

Rosalina

Weight Class: Heavy

This cosmic guardian is definitely made of star stuff, and isn't afraid to cut loose on the track. Being a heavyweight, she can toss aside a surprising number of rival racers in pursuit of victory!

• Weight: 8	• Speed (Land): 8	• Handling (Land): 2
• Acceleration: 1	• Speed (Sea): 8	• Handling (Sea): 2
• Grip: 1	• Speed (Flying): 8	• Handling (Flying): 2
• Mini-Turbo: 1	• Speed (Weight): 8	• Handling (Weight): 2

Metal Mario

Weight Class: Heavy

As heavy as Wario, but not quite as fast, Metal Mario does enjoy some better handling in exchange for losing that speed.

• Weight: 10	• Speed (Land): 8	• Handling (Land): 2
• Acceleration: 0	• Speed (Sea): 8	• Handling (Sea): 2
• Grip: 0	• Speed (Flying): 8	• Handling (Flying): 2
• Mini-Turbo: 0	• Speed (Weight): 8	• Handling (Weight): 2

Lakitu

Weight Class: Light

Watch enough races, and you'll eventually want to be in one. Lakitu joins the fray, and as you might expect he shows excellent ability in the air.

• Weight: 2	• Speed (Land): 2	• Handling (Land): 8
• Acceleration: 4	• Speed (Sea): 2	• Handling (Sea): 8
• Grip: 4	• Speed (Flying): 2	• Handling (Flying): 8
• Mini-Turbo: 4	• Speed (Weight): 2	• Handling (Weight): 8

Toadette

Weight Class: Light

Toadette's not about to let Toad win all the glory. Proud in pink, this spunky sister can race as hard as any other lightweight.

• Weight: 2	• Speed (Land): 2	• Handling (Land): 8
• Acceleration: 4	• Speed (Sea): 2	• Handling (Sea): 8
• Grip: 4	• Speed (Flying): 2	• Handling (Flying): 8
• Mini-Turbo: 4	• Speed (Weight): 2	• Handling (Weight): 8

Baby Rosalina

Weight Class: Featherweight

Protectors of the stars gotta start small...

• Weight: 0	• Speed (Land): 0	• Handling (Land): 10
• Acceleration: 5	• Speed (Sea): 0	• Handling (Sea): 10
• Grip: 5	• Speed (Flying): 0	• Handling (Flying): 10
• Mini-Turbo: 5	• Speed (Weight): 0	• Handling (Weight): 10

Pink Gold Peach

Weight Class: Heavy

Donning a metal look just like her beloved plumber, Pink Gold Peach outweighs most of the competition, and is plenty fast to boot!

• Weight: 10	• Speed (Land): 8	• Handling (Land): 2
• Acceleration: 0	• Speed (Sea): 8	• Handling (Sea): 2
• Grip: 0	• Speed (Flying): 8	• Handling (Flying): 2
• Mini-Turbo: 0	• Speed (Weight): 8	• Handling (Weight): 2

Iggy

Weight Class: Medium

The crazed mechanical Koopaling genius returns with his brothers and sister! Iggy's solidly in the Medium weight class, and is good a match for Mario and Luigi.

• Weight: 6	• Speed (Land): 6	• Handling (Land): 4
• Acceleration: 2	• Speed (Sea): 6	• Handling (Sea): 4
• Grip: 2	• Speed (Flying): 6	• Handling (Flying): 4
• Mini-Turbo: 2	• Speed (Weight): 6	• Handling (Weight): 4

Roy

Weight Class: Heavy

Roy's always been the brawler of the Koopalings, and he's not changed a bit in *Mario Kart 8*. Unafraid to wear pink and mix it up with other racers, Roy's more than capable of fighting his way to the lead.

• Weight: 8	• Speed (Land): 8	• Handling (Land): 2
• Acceleration: 1	• Speed (Sea): 8	• Handling (Sea): 2
• Grip: 1	• Speed (Flying): 8	• Handling (Flying): 2
• Mini-Turbo: 1	• Speed (Weight): 8	• Handling (Weight): 2

Lemmy

Weight Class: Featherweight

The smallest and lightest Koopaling is also the craziest! Lemmy's quick off the starting line, but is susceptible to getting shoved around by almost everyone else.

• Weight: 0	• Speed (Land): 0	• Handling (Land): 10
• Acceleration: 5	• Speed (Sea): 0	• Handling (Sea): 10
• Grip: 5	• Speed (Flying): 0	• Handling (Flying): 10
• Mini-Turbo: 5	• Speed (Weight): 0	• Handling (Weight): 10

Larry

Weight Class: Light

Lightweight Larry is right at home on the *Mario Kart 8* circuit. Of all the Koopalings, Larry is quite the cheatsy devil, and an experienced schemer.

• Weight: 2	• Speed (Land): 2	• Handling (Land): 8
• Acceleration: 4	• Speed (Sea): 2	• Handling (Sea): 8
• Grip: 4	• Speed (Flying): 2	• Handling (Flying): 8
• Mini-Turbo: 4	• Speed (Weight): 2	• Handling (Weight): 8

Wendy

Weight Class: Light

Wendy doesn't have her magic rings to help her on the course, but she doesn't need them to be a dominating lightweight racer!

• Weight: 2	• Speed (Land): 2	• Handling (Land): 8
• Acceleration: 4	• Speed (Sea): 2	• Handling (Sea): 8
• Grip: 4	• Speed (Flying): 2	• Handling (Flying): 8
• Mini-Turbo: 4	• Speed (Weight): 2	• Handling (Weight): 8

Ludwig

Weight Class: Medium

Ludwig has followed his fellow Koopalings to the races, intending to compose his own victory anthem should he win... which as far as he's concerned is the obvious outcome.

• Weight: 6	• Speed (Land): 6	• Handling (Land): 4
• Acceleration: 2	• Speed (Sea): 6	• Handling (Sea): 4
• Grip: 2	• Speed (Flying): 6	• Handling (Flying): 4
• Mini-Turbo: 2	• Speed (Weight): 6	• Handling (Weight): 4

Morton

Weight Class: Cruiser

Morton's the biggest of all the Koopalings, and he's not afraid to throw that weight around. One of the Cruisers in the game, Morton's got serious **Time Trial** potential for those willing to practice wrangling him around the track.

• Weight: 10	• Speed (Land): 10	• Handling (Land): 0
• Acceleration: 0	• Speed (Sea): 10	• Handling (Sea): 0
• Grip: 0	• Speed (Flying): 10	• Handling (Flying): 0
• Mini-Turbo: 0	• Speed (Weight): 10	• Handling (Weight): 0

Mii

Weight Class: Variable (Medium stats listed below)

Unlocked eighth out of all the extra racers, your Mii avatar can either fall within the Medium, Cruiser, or Featherweight classes, depending on the height you've made your Mii, which alters its stats accordingly. This means the Mii can either be as light as one of the babies, or as heavy as Bowser!

• Weight: 6	• Speed (Land): 6	• Handling (Land): 4
• Acceleration: 2	• Speed (Sea): 6	• Handling (Sea): 4
• Grip: 2	• Speed (Flying): 6	• Handling (Flying): 4
• Mini-Turbo: 2	• Speed (Weight): 6	• Handling (Weight): 4

The Racers and Rides Vehicle Customization

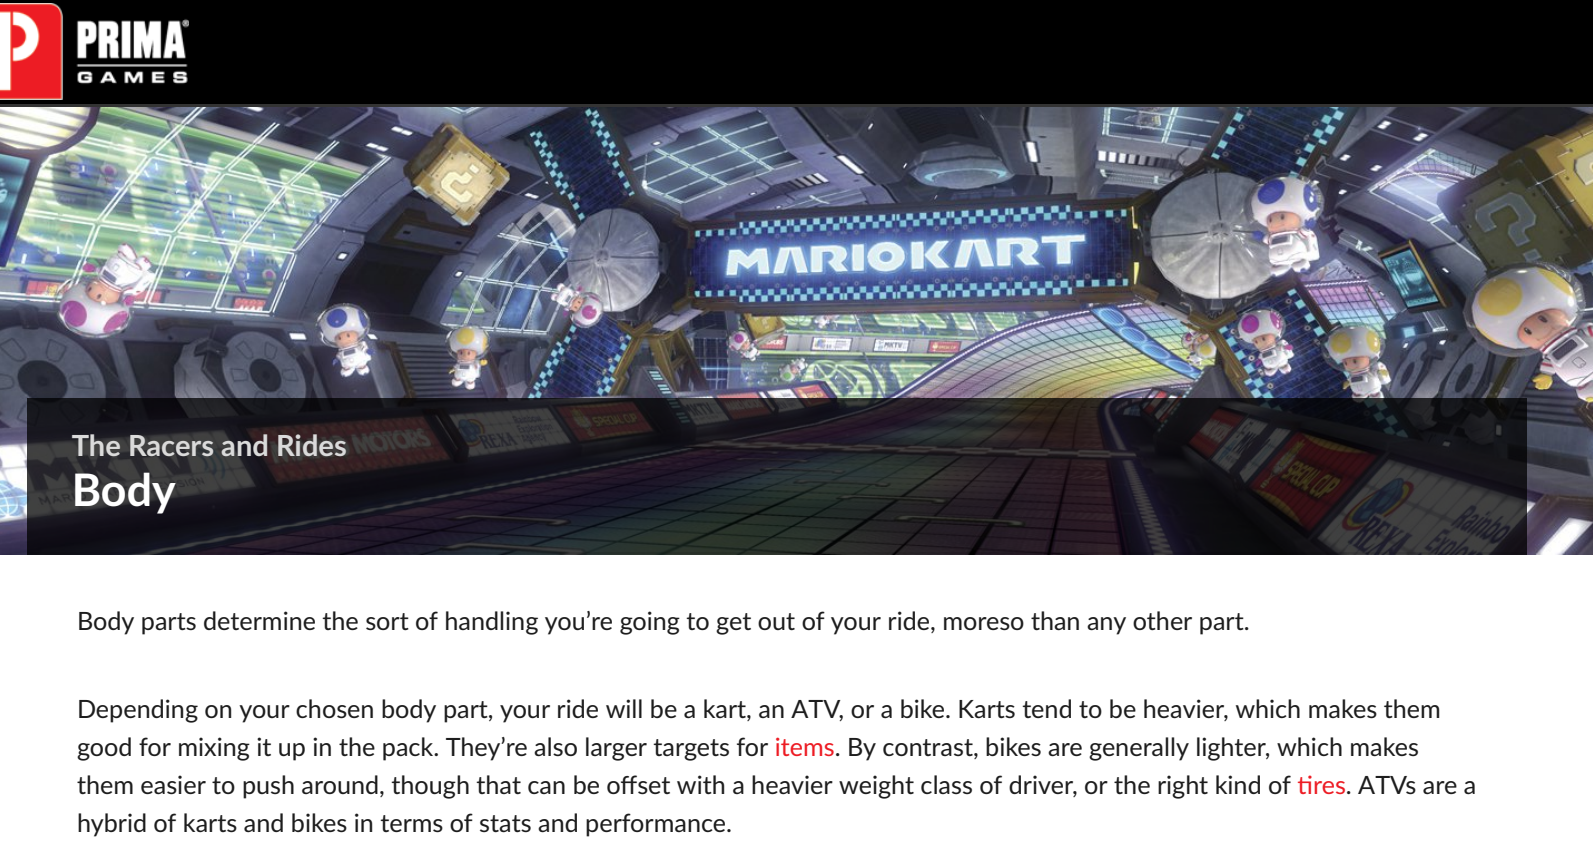

After selecting your driver, you are taken to a screen where you are allowed to construct a kart or bike out of the parts available to you. While your early selection of parts limits you at first, you can unlock a wide array of karts, bikes, **tires**, and **gliders** that suit your needs!

Unlocking Parts

As you take on the various **Grand Prix** cups, and race online against live opponents, you will unlock a number of parts to help tune up your machine. Initially, parts are unlocked with every 50 Coins you collect, up until you've collected a total of 1,000 Coins. From then on, you gain a new part for every 100 Coins collected, until you hit 2,800 Coins collected total.

There are three specific parts that do not get unlocked in this fashion:

- **Gold Standard Kart:** This **body** part requires that you score at least one star on every **Grand Prix**. At the bare minimum, you must score 54 points by the end of the final race in a **Grand Prix**!
- **Gold Tires:** These shiny **tires** can be unlocked if you are able to beat the Staff Ghost on every course in **Time Trial** mode.
- **Gold Glider:** To get yourself some wings of gold, you have to collect 10,000 Coins! Note that this counts Coins picked up from the track, and the Coins earned from Item Boxes. This can be made to go faster by playing lots of local multiplayer races with friends.

The Racers and Rides Body

Body parts determine the sort of handling you're going to get out of your ride, moreso than any other part.

Depending on your chosen body part, your ride will be a kart, an ATV, or a bike. Karts tend to be heavier, which makes them good for mixing it up in the pack. They're also larger targets for **items**. By contrast, bikes are generally lighter, which makes them easier to push around, though that can be offset with a heavier weight class of driver, or the right kind of **ires**. ATVs are a hybrid of karts and bikes in terms of stats and performance.

What's the Difference Between Karts, Bikes, and ATVs?

The real difference is in the style of drifts. Karts and ATVs drift similarly to each other. When drifting, a kart and an ATV tend to slide away from a turn to widen its arc. Drifting in these body types is also very controllable, letting players adjust themselves mid-drift.

Where things get interesting is with bikes. There are actually two sub-categories of bike: standard and sport. Standard bikes drift similarly to every other body type. Sport bikes more or less commit to the turn during a drift, sharply cutting in the direction of the turn. This makes the sport bikes very difficult to adjust mid-turn, and makes inexperience in this body type very costly when you start drifting into rough **terrain** or hazards you'd normally be able to skirt around by adjusting your drift with other body types. Sport bikes do tend to be very fast, which can offset the challenges of drifting with one.

Starter Bodies

These bodies are available when you begin the game.

Standard Kart

Body Type: Kart		
• Weight: 2	• Speed (Land): 3	• Handling (Land): 2
• Acceleration: 2	• Speed (Sea): 3	• Handling (Sea): 2
• Grip: 5	• Speed (Flying): 2	• Handling (Flying): 1
• Mini-Turbo: 3	• Speed (Weight): 4	• Handling (Weight): 3

Mach 8

Body Type: Kart		
• Weight: 3	• Speed (Land): 5	• Handling (Land): 2
• Acceleration: 1	• Speed (Sea): 4	• Handling (Sea): 2
• Grip: 1	• Speed (Flying): 4	• Handling (Flying): 1
• Mini-Turbo: 1	• Speed (Weight): 5	• Handling (Weight): 2

Badwagon

Body Type: Kart		
• Weight: 4	• Speed (Land): 3	• Handling (Land): 0
• Acceleration: 0	• Speed (Sea): 5	• Handling (Sea): 5
• Grip: 7	• Speed (Flying): 2	• Handling (Flying): 0
• Mini-Turbo: 0	• Speed (Weight): 3	• Handling (Weight): 0

Biddybuggy

Body Type: Kart		
• Weight: 0	• Speed (Land): 0	• Handling (Land): 4
• Acceleration: 7	• Speed (Sea): 5	• Handling (Sea): 5
• Grip: 4	• Speed (Flying): 4	• Handling (Flying): 4
• Mini-Turbo: 7	• Speed (Weight): 0	• Handling (Weight): 3

Standard Bike

Body Type: Bike		
• Weight: 1	• Speed (Land): 3	• Handling (Land): 0
• Acceleration: 3	• Speed (Sea): 5	• Handling (Sea): 5
• Grip: 3	• Speed (Flying): 2	• Handling (Flying): 0
• Mini-Turbo: 4	• Speed (Weight): 3	• Handling (Weight): 0

Sport Bike

Body Type: Bike		
• Weight: 1	• Speed (Land): 3	• Handling (Land): 5
• Acceleration: 5	• Speed (Sea): 3	• Handling (Sea): 5
• Grip: 0	• Speed (Flying): 2	• Handling (Flying): 4
• Mini-Turbo: 5	• Speed (Weight): 3	• Handling (Weight): 5

Standard ATV

Body Type: ATV		
• Weight: 4	• Speed (Land): 3	• Handling (Land): 0
• Acceleration: 0	• Speed (Sea): 5	• Handling (Sea): 5
• Grip: 7	• Speed (Flying): 2	• Handling (Flying): 0
• Mini-Turbo: 0	• Speed (Weight): 3	• Handling (Weight): 0

Unlockable Bodies

These bodies are unlocked at random, save for the Gold Standard Kart.

Pipe Frame

Body Type: Kart		
• Weight: 1	• Speed (Land): 3	• Handling (Land): 4
• Acceleration: 3	• Speed (Sea): 4	• Handling (Sea): 4
• Grip: 3	• Speed (Flying): 3	• Handling (Flying): 3
• Mini-Turbo: 4	• Speed (Weight): 3	• Handling (Weight): 4

Steel Driver

Body Type: Kart		
• Weight: 4	• Speed (Land): 3	• Handling (Land): 0
• Acceleration: 0	• Speed (Sea): 5	• Handling (Sea): 5
• Grip: 7	• Speed (Flying): 2	• Handling (Flying): 0
• Mini-Turbo: 0	• Speed (Weight): 3	• Handling (Weight): 0

Cat Cruiser

Body Type: Kart		
• Weight: 2	• Speed (Land): 3	• Handling (Land): 2
• Acceleration: 2	• Speed (Sea): 3	• Handling (Sea): 2
• Grip: 5	• Speed (Flying): 2	• Handling (Flying): 1
• Mini-Turbo: 3	• Speed (Weight): 4	• Handling (Weight): 3

Circuit Special

Body Type: Kart		
• Weight: 3	• Speed (Land): 5	• Handling (Land): 2
• Acceleration: 1	• Speed (Sea): 4	• Handling (Sea): 2
• Grip: 1	• Speed (Flying): 4	• Handling (Flying): 1
• Mini-Turbo: 1	• Speed (Weight): 5	• Handling (Weight): 2

Tri-Spieder

Body Type: Kart		
• Weight: 4	• Speed (Land): 3	• Handling (Land): 0
• Acceleration: 0	• Speed (Sea): 5	• Handling (Sea): 5
• Grip: 7	• Speed (Flying): 2	• Handling (Flying): 0
• Mini-Turbo: 0	• Speed (Weight): 3	• Handling (Weight): 0

Prancer

Body Type: Kart		
• Weight: 2	• Speed (Land): 3	• Handling (Land): 2
• Acceleration: 2	• Speed (Sea): 3	• Handling (Sea): 2
• Grip: 5	• Speed (Flying): 2	• Handling (Flying): 1
• Mini-Turbo: 3	• Speed (Weight): 4	• Handling (Weight): 3

Landship

Body Type: Kart		
• Weight: 0	• Speed (Land): 0	• Handling (Land): 4
• Acceleration: 7	• Speed (Sea): 5	• Handling (Sea): 5
• Grip: 4	• Speed (Flying): 4	• Handling (Flying): 4
• Mini-Turbo: 7	• Speed (Weight): 0	• Handling (Weight): 3

Sneaker

Body Type: Kart		
• Weight: 2	• Speed (Land): 3	• Handling (Land): 2
• Acceleration: 2	• Speed (Sea): 3	• Handling (Sea): 2
• Grip: 5	• Speed (Flying): 2	• Handling (Flying): 1
• Mini-Turbo: 3	• Speed (Weight): 4	• Handling (Weight): 3

Sports Coupe

Body Type: Kart		
• Weight: 3	• Speed (Land): 5	• Handling (Land): 2
• Acceleration: 1	• Speed (Sea): 4	• Handling (Sea): 2
• Grip: 1	• Speed (Flying): 4	• Handling (Flying): 1
• Mini-Turbo: 1	• Speed (Weight): 5	• Handling (Weight): 2

Gold Standard

Body Type: Kart		
• Weight: 3	• Speed (Land): 5	• Handling (Land): 2
• Acceleration: 1	• Speed (Sea): 4	• Handling (Sea): 2
• Grip: 1	• Speed (Flying): 4	• Handling (Flying): 1
• Mini-Turbo: 1	• Speed (Weight): 5	• Handling (Weight): 2

Comet

Body Type: Bike		
• Weight: 1	• Speed (Land): 3	• Handling (Land): 5
• Acceleration: 5	• Speed (Sea): 3	• Handling (Sea): 5
• Grip: 0	• Speed (Flying): 2	• Handling (Flying): 4
• Mini-Turbo: 5	• Speed (Weight): 3	• Handling (Weight): 5

The Duke

Body Type: Bike		
• Weight: 2	• Speed (Land): 3	• Handling (Land): 2
• Acceleration: 2	• Speed (Sea): 3	• Handling (Sea): 2
• Grip: 5	• Speed (Flying): 2	• Handling (Flying): 1
• Mini-Turbo: 3	• Speed (Weight): 4	• Handling (Weight): 3

Flame Rider

Body Type: Bike		
• Weight: 1	• Speed (Land): 3	• Handling (Land): 4
• Acceleration: 3	• Speed (Sea): 4	• Handling (Sea): 4
• Grip: 3	• Speed (Flying): 3	• Handling (Flying): 3
• Mini-Turbo: 4	• Speed (Weight): 3	• Handling (Weight): 4

Varmint

Body Type:		
• Weight: 1	• Speed (Land): 3	• Handling (Land): 4
• Acceleration: 3	• Speed (Sea): 4	• Handling (Sea): 4
• Grip: 3	• Speed (Flying): 3	• Handling (Flying): 3
• Mini-Turbo: 4	• Speed (Weight): 3	• Handling (Weight): 4

Mr. Scooty

Body Type: Bike		
• Weight: 0	• Speed (Land): 0	• Handling (Land): 4
• Acceleration: 7	• Speed (Sea): 5	• Handling (Sea): 5
• Grip: 4	• Speed (Flying): 4	• Handling (Flying): 3
• Mini-Turbo: 7	• Speed (Weight): 0	• Handling (Weight): 4

Jet Bike

Body Type: Bike		
• Weight: 1	• Speed (Land): 3	• Handling (Land): 5
• Acceleration: 5	• Speed (Sea): 3	• Handling (Sea): 5
• Grip: 0	• Speed (Flying): 2	• Handling (Flying): 4
• Mini-Turbo: 5	• Speed (Weight): 3	• Handling (Weight): 5

Yoshi Bike

Body Type: Bike		
• Weight: 1	• Speed (Land): 3	• Handling (Land): 5
• Acceleration: 5	• Speed (Sea): 3	• Handling (Sea): 5
• Grip: 0	• Speed (Flying): 2	• Handling (Flying): 4
• Mini-Turbo: 5	• Speed (Weight): 3	• Handling (Weight): 5

Wild Wiggler

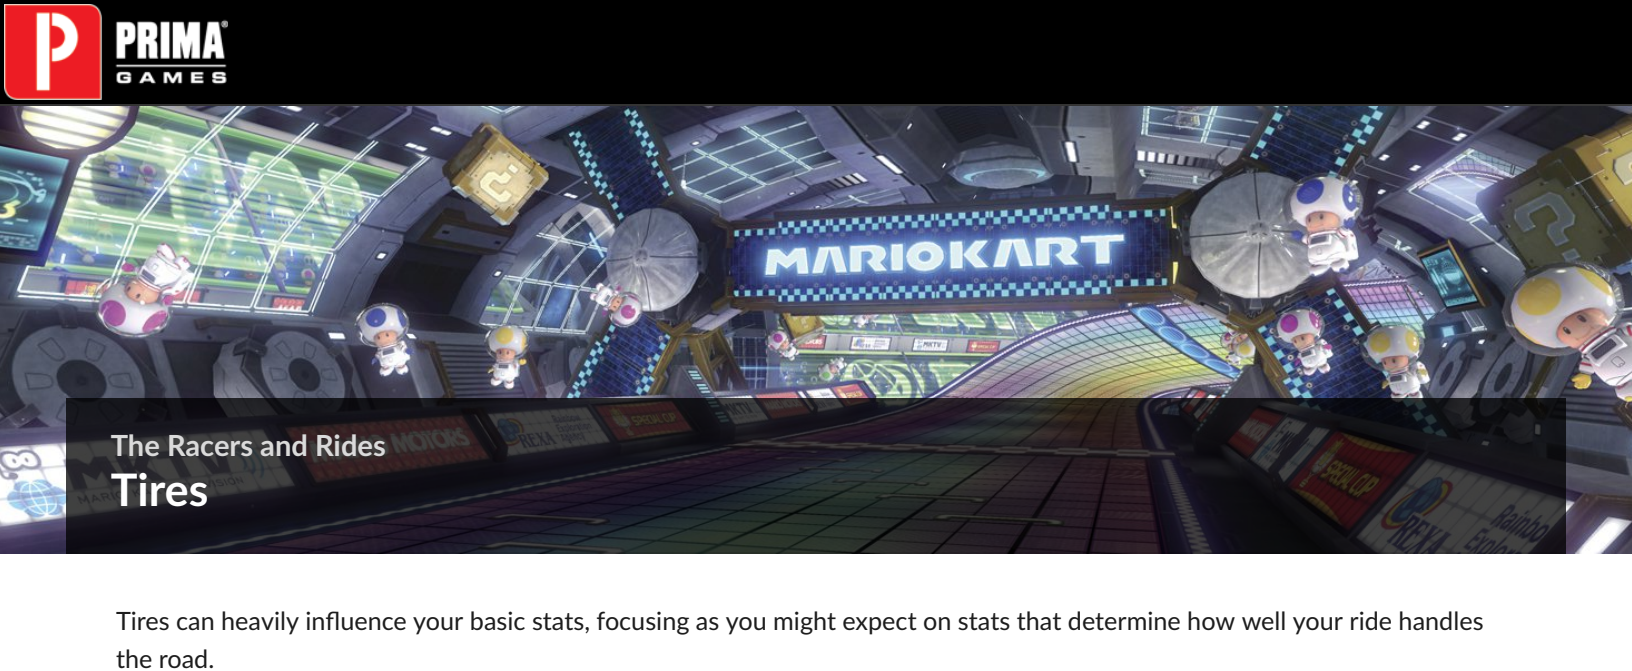

Body Type: ATV		
• Weight: 1	• Speed (Land): 3	• Handling (Land): 4
• Acceleration: 3	• Speed (Sea): 4	• Handling (Sea): 4
• Grip: 3	• Speed (Flying): 3	• Handling (Flying): 3
• Mini-Turbo: 4	• Speed (Weight): 3	• Handling (Weight): 4

Teddy Buggy

Body Type: ATV		
• Weight: 2	• Speed (Land): 3	• Handling (Land): 2
• Acceleration: 2	• Speed (Sea): 3	• Handling (Sea): 2
• Grip: 5	• Speed (Flying): 2	• Handling (Flying): 1
• Mini-Turbo: 3	• Speed (Weight): 4	• Handling (Weight): 3

The Racers and Rides Tires

Tires can heavily influence your basic stats, focusing as you might expect on stats that determine how well your ride handles the road.

Starter Tires

These tires are available when you begin the game.

Standard

• Weight: 2	• Speed (Land): 2	• Handling (Land): 3
• Acceleration: 2	• Speed (Sea): 4	• Handling (Sea): 3
• Grip: 4	• Speed (Flying): 2	• Handling (Flying): 3
• Mini-Turbo: 0	• Speed (Weight): 2	• Handling (Weight): 3

Monster

• Weight: 4	• Speed (Land): 2	• Handling (Land): 0
• Acceleration: 0	• Speed (Sea): 2	• Handling (Sea): 0
• Grip: 7	• Speed (Flying): 0	• Handling (Flying): 0
• Mini-Turbo: 0	• Speed (Weight): 2	• Handling (Weight): 0

Roller

• Weight: 0	• Speed (Land): 0	• Handling (Land): 4
• Acceleration: 6	• Speed (Sea): 4	• Handling (Sea): 4
• Grip: 3	• Speed (Flying): 4	• Handling (Flying): 4
• Mini-Turbo: 6	• Speed (Weight): 0	• Handling (Weight): 4

Slim

• Weight: 2	• Speed (Land):3	• Handling (Land): 4
• Acceleration: 1	• Speed (Sea): 3	• Handling (Sea): 4
• Grip: 2	• Speed (Flying): 3	• Handling (Flying): 4
• Mini-Turbo: 1	• Speed (Weight): 3	• Handling (Weight): 4

Wood

• Weight: 1	• Speed (Land): 1	• Handling (Land): 2

• Weight: 1	• Speed (Land): 1	• Handling (Land): 1
• Acceleration: 2	• Speed (Sea): 1	• Handling (Sea): 1
• Grip: 1	• Speed (Flying): 1	• Handling (Flying): 2
• Mini-Turbo: 2	• Speed (Weight): 1	• Handling (Weight): 1

Gold Glider

• Weight: 2	• Speed (Land): 1	• Handling (Land): 1
• Acceleration: 1	• Speed (Sea): 1	• Handling (Sea): 1
• Grip: 1	• Speed (Flying): 2	• Handling (Flying): 1
• Mini-Turbo: 1	• Speed (Weight): 1	• Handling (Weight): 1

Note

The Gold Glider is awarded once you have collected 10,000 Coins.

Note

This part is unlocked by scoring at least one star in every **Grand Prix**.

PRIMA
GAMES

Grand Prix and Time Trials Introduction

The **Grand Prix** Cups and **Time Trial** modes of *Mario Kart 8* focus very specifically on two aspects of the game. Both modes want you to go fast. How you go about it changes dramatically depending on what you're doing!

Starting a Race

Race Rewards

There are four difficulty settings in *Mario Kart 8*: 50cc, 100cc, 150cc, and Mirror Mode. Starting with the slowest 50cc, each step up means higher speeds and more aggressive COM racers.

Mirror Mode does what it is named after, and mirrors every course. Familiar lefts become unfamiliar rights. This can be disorienting at first, but other than being mirrored, the courses are more or less exactly the same. You must place first in all eight cups on 150cc first before you unlock the ability to race on Mirror Mode! A cup is considered beaten by placing in the top three overall by the end of four races.

Star Ratings

60 Points: 3 Stars

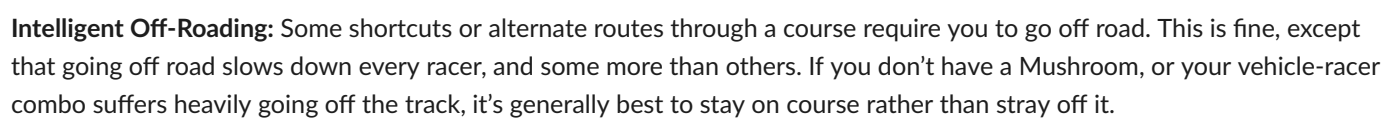

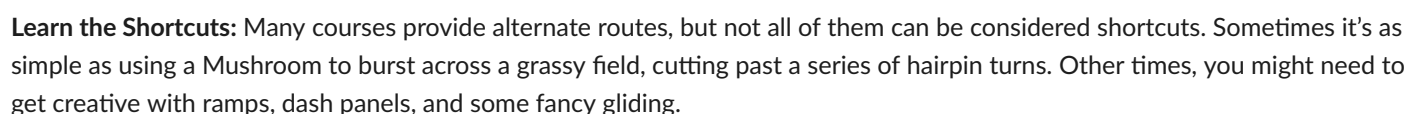

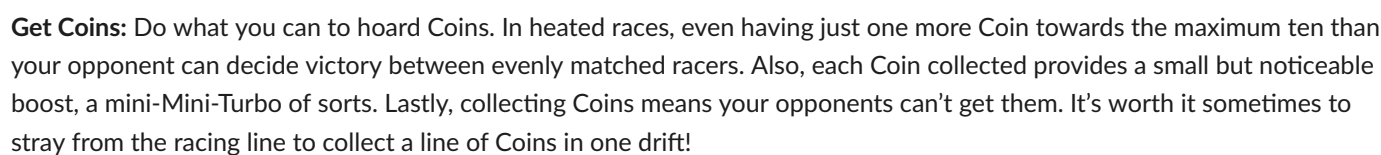

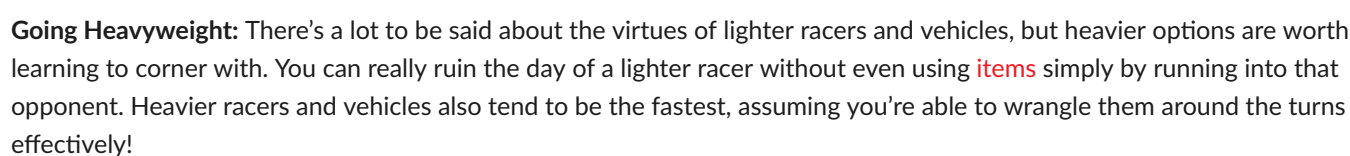

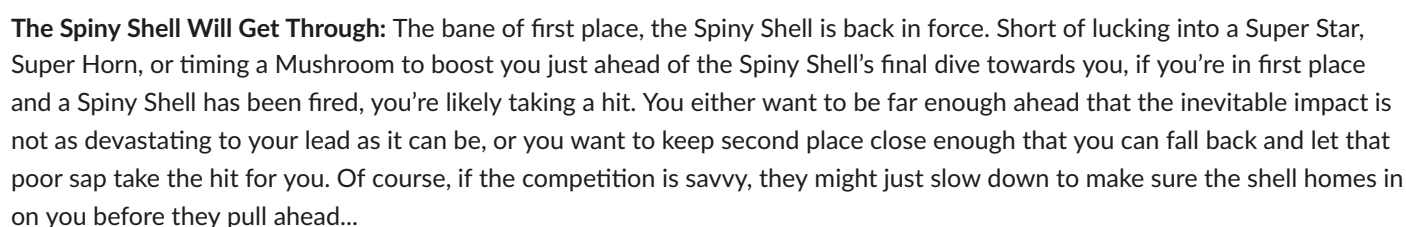

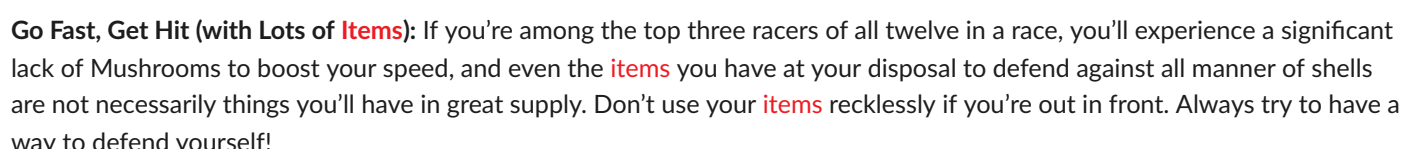

57 Points: 2 Stars

55-54 Points: 1 Star

One of the kart chassis you can unlock requires you to score at least one star on every Grand Prix.

Grand Prix Tips

Against the computer-driven racers, against your friends in split-screen multiplayer, or racing against rivals around the world online, Grand Prix races don't just reward the fastest racer, they also reward the most cunning, sneaky, and devious racer. Make no mistake, you want to be at the front of the pack after three laps, but expect everyone behind you to use every item in the game's arsenal to make your life difficult. As such, there's a few specific tips to deal with the deluge of shells, Bananas, and Bob-ombs that will stand between you and a first-place finish.

Grand Prix and Time Trials

Time Trial

Distilling *Mario Kart* down to speed and speed alone, the Time Trial mode allows you to race against the clock, against the ghosts of your previous laps, and the ghosts of other players online, all to set the fastest laps and races through all thirty-two tracks in the game.

Time Trial Tips

Racing in the Time Trials is fundamentally different from the **Grand Prix**. It's just you against the track. You get three Mushrooms, and the only other **items** you can collect are Coins. The fastest Time Trials on a course demand racers to take the best racing lines while also managing their Mushrooms and collecting Coins in the process.

Keep in mind that some of the fastest times will require that you unlock more parts to optimize your maximum speed and your ability to corner effectively with well-executed drifts and Mini-Turbos.

Ten Coins: You start each Time Trial with zero Coins. Your goal should be to reach the ten Coin max as early as possible. However, don't sacrifice speed or a good line through a turn just to collect wayward Coins! Once you reach ten Coins, concentrate on the fastest racing line, collecting Coins only if they are in your way. Note that there may be some courses where getting ten Coins isn't a reasonable proposition, since that might require you to take longer lines around turns to pick up the Coins.

Coins Do Not Regenerate: Unlike in **Grand Prix** mode, during Time Trials Coins do not regenerate on the track. Part of the strategy to a Time Trial is to have a route that is not only the fastest, but will also guarantee that you pick as many Coins as you can, while maintaining a fast racing line. Since the Coins can only be picked up once, you can't rely on Coins always being around to make up for mistakes.

Drifting: How you drift will make a huge difference in how you get through turns. Remember, your goal on nearly every turn is to take them on as close to the inside of the course as you can get away with, and proper drifting is essential.

Use Mushrooms Wisely: Not every course has shortcuts that require the use of a Mushroom, so in these instances you might want to conserve Mushrooms for a final sprint, or for cleaning up after a minor mistake exiting or entering a turn. Generally, Mushrooms should be used once per lap/course section.

Study the Ghosts: The lap ghosts made by you and other players with the game can teach you a lot regarding how you should race through a course. If you're serious about breaking records, you need to observe what the ghost is doing, and the sort of racer-vehicle combination they have going on!

Manage your Mini-Turbos: You don't always have to go with orange spark Super Mini-Turbos! Sometimes, it's best to squeeze out more blue spark Mini-Turbos during a turn, rather than risk eating a wall or straying off course just to get those orange sparks going!

The New Tracks

Mario Kart Stadium

The starting course of your *Mario Kart 8* career, the Mario Kart Stadium features long stretches of track connected by easy-to-drift-through turns. While it's not a particularly difficult track to race on, it's a good preview of what you can expect in later race courses in this cup and in future cups!

Roadside Unassistance

Pipes: Scattered on the grassy and sandy corners of the track are pipes. By themselves they are harmless, but if you're trying to cut corners and end up hitting a pipe head on, you'll come to a complete stop!

Grass and Sand: All vehicles slow down when going off-road, but with the right parts you can limit how much speed you lose. Stay on track unless you're using a Mushroom to boost off road to cut a corner.

Kite

Grand Prix

The second turn of the race provides an example of a common *Mario Kart 8* dilemma: taking the corner wide will push you along a series of dash panels and a set of Coins. Taking the inside route is faster, but has no Coins. Your first laps in every race should be about building up your Coin count. Afterwards, consider the inside path every time.

You can cut this corner with a Mushroom, if you have one. Just mind the pipes!

Just past the second turn is an antigravity panel that lets you stick to the track as it twists around. The next corner can also be cut with a Mushroom if you have one, and has a ramp you can Jump Boost off of.

The hairpin turn near the end of the antigravity section of track leads to a small ramp that will let you glide over a chasm. If you're far behind and have a Lightning Bolt, you can send racers into the chasm as they try to glide across. Don't miss collecting Coins on the way over the gap!

The last set of turns presents another split roadway, with the wider racing line taking you over a set of dash panels and more Coins. The wider line ends with a ramp you can Jump Boost off of for additional speed.

Alternatively, you can cut the corner even tighter by using a Mushroom and going through the sand. Many pipes are set up here, so be careful about how you blast through this area. This is also a good tactic to defeat incoming Red Shells, as they might hit the pipes.

Time Trial Mode

Lap 1 of any **Time Trial** should be focused on snagging as many Coins as possible. Turn 1 has a pair of Coins to snag, followed by four more on the outside of Turn 2. It's actually faster to ignore those Coins on the outside of Turn 2, and instead take the inside of the turn as close to the grass as possible. You can use a Mushroom to cut across the grass, but you might want to save that for later.

It is reasonable to want to use one of your Mushrooms to hit the ramp on the grass on the inside of Turn 3. However, this is not the best use of a Mushroom on this **Time Trial**.

Turn 4 has five Coins located on it: two on the inside line and three on the outside. Stay inside on the first lap, and every lap thereafter. Ideally you should have eight Coins after navigating this turn.

Set up your drift on the Turn 5 hairpin as early as you can. You can score a Super Mini-Turbo and boost back downhill towards the glide ramp.

Mid-air from the glide ramp, you have some work to prepare for the end of the lap. On Lap 1, you can snag your final Coins to reach ten while in mid-air.

As you're gliding down, avoid the ramp at the center of the course. As you pass up the ramp, drift towards the sand and the pipes on the inside of the final turn. You should be able to pull off a Mini-Turbo just as you reach the sand.

The scattered pipes on the sand can be devastating to hit during a **Time Trial**, but the best time to use Mushrooms is to blitz through this pipe forest across the sand. By doing this, you cut the corner and practically have a straight shot at the finish line!

Video is restricted

Roadside Unassistance

-  **Spin Boost Pillars:** Found at the front of Marine Coasters that travel through a portion of the race course, these pillars give you a Spin Boost of speed at the cost of some control.
-  **Water Hazards:** A good chunk of this course takes place underwater, which will significantly change how your vehicle drives.

Nintendo's Best Time: 1:48.231

Racer: Wario

Body:
Sport
Bike

Wheels:
Cyber
Slick

Glider:
Parafoil

Just after the start line, you pass through one of three entrances under

the Marine Coaster sign into a hard right turn. You can cut this turn significantly on the right side and line yourself up for the upcoming twin ramps.

The two ramps after the first right lead directly to an antigravity section of track. Be sure to Jump Boost off the ramp you choose for some extra speed going into the water.

1

The submarine can be encountered on almost any section of the antigravity track. If you brush past the front of the coaster, you can gain some speed from the Spin Boost pillars. Other coasters can traverse this section of the course, so keep an eye out for them.

The sub coaster track ends as it dips back into the water, straight into an S-curve that passes by an Aqua Cup ride. With a Mushroom, you can cut through the Aqua Cup area to avoid having to navigate the S-curve yourself.

The home stretch starts with a launch ramp that will deploy your glider. Guide yourself underneath the Ferris wheel to finish the Lap, taking care to avoid the ticket booth just beyond it. It's possible to land on top of the ticket booth, but beware of other racers setting Bananas there!

As soon as you start the **Time Trial**, collect one of the two Coins on either side of the track in front of the start line. Collect the other set during Lap 2.

Turn 1 can and should be cut extremely tight—the course is designed for it!

The split ramp jump into the water has three Coins on the upper ramp, so for Lap 1 you should take that path. For the following laps, keep to the inside racing line. Don't forget to Jump Boost off the ramps!

This long antigravity curve is a good spot to use a Mushroom and fire off a Super Mini-Turbo.

Another chance to use one of your Mushrooms is when you re-enter the water near the Aqua Cup ride. You can cut across the spinning platform to the left of the S-curve, but you miss out on some Coins in the process. If you take this shortcut, start drifting right as you cross the ride to align yourself for the glide ramp. Start drifting right as you cross the ride to align yourself for the glide ramp.

The glide ramp that launches you towards the Ferris wheel is a critical point of the lap. If you have enough speed and are properly lined up, you'll be able to land on top of the ticket booth beyond the Ferris wheel. Jump Boost off the edge of the booth for the final push to the finish line.

Video is restricted

The New Tracks

Sweet Sweet Canyon

A step up in challenge even over **Water Park**, this canyon is a sugary, high-speed course, featuring a massive jump that connects both halves of the course. Numerous sharp hairpin turns await during the latter half of the course. Sweet Sweet Canyon will teach you the importance of proper drifting and the use of Mini-Turbos, if you want to score a first-place finish.

Roadside Unassistance

Arguably Delicious Frosting: Going off-road here is sweeter, but not any faster than the dirt found outside of normal tracks. Much of the course is lined with frosting near the retaining walls.

No Walls: Portions of the course have no retaining walls. Mind your drifts in these situations!

The Long Jump: Early on in a lap, you cross a massive chasm via glider. Racers are vulnerable to Lightning Bolts, Red Shells, and Spiny Shells while crossing this gap.

Piranha Plants: The final set of curves are guarded by massive Piranha Plants, who will try to bite at any racer who gets too close.

Kart of Champions		
Nintendo's Best Time: 1:57.071		
Player: Jeff C. M.		
<div></div>		
Racer: Wario	Body: Sport Bike	Wheels: Slick Glider: Parafoil

Grand Prix

The first turns of the course take you into the tunnel that will eventually launch you across the chasm to the main part of the course.

The chasm flight goes quickly, and you don't have to worry about steering around obstacles. Your biggest threat will be other racers, particularly those with a Lightning Bolt or Spiny Shell. Getting hit by **items** here will send you into the waters below, and can send you back to the launch ramp!

The ice cream cones on the track here are harmless. You can easily bowl them over with no problems. Concentrate more on collecting the Coins lining the road here.

The antigravity section of the canyon offers you two routes, left and right. You can Jump Boost off the antigravity panels for some extra speed before starting these winding sections. They are essentially mirrors of each other, so there isn't necessarily a best path to take.

Both of the antigravity track sections consist of three alternating sharp turns, the second of which you can cut across the frosting with a Mushroom if you wish. However, you may want to save your Mushroom for another, superior shortcut.

Jump Boost off the ramps at the end of the split track section, then get ready to avoid the Piranha Plants flanking the road. The S-curves here are easy to drift wide on if you're careless, right into range of a Piranha Plant!

The most important shortcut of the track is just beyond the second Piranha Plant, marked by a donut arch. If you have a Mushroom, shoot through the donut, then make a sharp left and Jump Boost off the ramp to power across the finish line. COM racers will try to use this shortcut often, so if you're not able to take it, try to set Bananas on the approach to it to trip them up.

The last turn, if you can't take the shortcut, is the sharpest on the track, and can be tougher for heavier-weight racers to drift through without hitting the walls. Start your drift early to hug the inside line.

Time Trial Mode

Turns 1 and 2 are critical to your **Time Trial**. Mini-turbo drift through Turn 1, and go for the Super Mini-Turbo drift on Turn 2. If you are aligned right, you can snag two of the four Coins before you reach the glide ramp.

After landing from the long jump, the massive curve follow-up has four Coins to collect. However it is faster to hug the wall to the right and go for Mini-Turbos. It is possible to do a standard Mini-Turbo before trying for the Super Mini-Turbo before you get to the track split.

The split routes through and over the water are functionally the same. The right path tends to line you up better for the section beyond, but there is no best choice. Each route features three Coins to collect. If you reach this section on Lap 2 without 10 Coins, remember to take the path that you missed to collect the Coins there.

This is where things get exciting. As you leave the split track, collect some Coins while avoiding the Piranha Plants on the side of the road. Your goal here is to line up for the donut shortcut on the off-road section of the track.

The shortcut requires you to use a Mushroom to boost through the donut hole. The real trick here is that as you're boosting through the donut, you need to already be drifting to the left, otherwise you'll be unable to correct your course in time and will likely hit the far wall. The Mini-Turbo off the drift should straighten you back out for the final stretch. Don't forget to Jump Boost off that last ramp!

Video is restricted

The New Tracks

Thwomp Ruins

A fast course that favors aggressive risk taking, the Thwomp Ruins are a perfect finale to the **Mushroom Cup**. Featuring multiple routes to follow across many sections of the whole course, skilled racers are afforded many different ways to overtake their opponents with more than just **items**.

Roadside Unassistance

Thwomps: Big, blocky, and more than happy to crush you or otherwise impede your progress, Thwomps are scattered throughout the aptly named ruins.

Rollers: The rollers don't make their appearance until Lap 2, and only on a very specific stretch of the course. It's possible to outrun them, or drive around them as necessary. Rollers can help open a path that can cut past parts of the track for a more direct route, so they are not all bad news.

Kart of Champions

Nintendo's Best Time: 1:57.193

Player: Greg R.

Racer: Mii

Gold
Standard

Wheels:
Slick

Glider:
Bowser
Kite

Grand Prix

The first turn just beyond the start line can be bypassed with a Mushroom. Aim for the stone ramp on the grassy field on the inside of Turn 1. Be careful for Bananas that COM drivers might try to use to block the approach to the ramp.

The cave you enter after Turn 2 at first seems rather barren. On Lap 2, rollers will start barreling through the center of the road on the ground. You can either stick to this main road or use the antigravity panels on the wall to the right to ride on the walls. It's faster to stay on the ground and hug the inside of the turn with drifts and Mini-Turbos, but the wall is good for collecting Coins.

Exiting the cave gives players many optional paths to race through. You can either stick to the middle and dive into the water 4, take the roads on the side 5, or even ride the walls on the side roads. Make sure to take advantage of any ramps and Jump Boost to keep up your speed.

On Lap 2, the rollers can knock down a wall at the center of the split in the road, where the small lake begins. Behind it is a glide ramp that can send you gliding over the water on a more direct path to the next cave. Just mind the Thwomp protecting the central island!

If you took the central route over and through the water, the stairs leading up from the depths can be Jump Boosted, which is a good way to speed into the second cave. You can also Jump Boost off the antigravity panel inside the cave itself.

Multiple Thwomps guard the stony S-curve just beyond the second cave. It's safest to favor the inside racing line to avoid the Thwomps.

Staying on the inside line can also set you up for a risky shortcut over a narrow stone ramp. One false move will send you into the abyss and likely cost you a place or two. Be especially careful around heavier racers. They can push you off easily if you're going in side by side.

The ramp, and the glide ramp it drops you next to, can be Jump Boosted. If you choose not to take this shortcut, be mindful of racers that do when you are taking the final turn, and be ready to use any **items** you have to ambush them if they land ahead of you.

The final stretch consists primarily of gliding over a chasm and down a hill towards the finish line. You can cancel the glide by landing early to Jump Boost off of one final ramp. If you time it right and land right on the ramp, and then jump just as you touch down, you'll gain the speed boost and maintain the glider flight.

Time Trial Mode

This is one of the most demanding Time Trials for all the **Mushroom Cup** courses, and arguably one of the most intense in the whole game.

From the moment you start (with a perfect Rocket Start of course), begin drifting left, while trying to keep traveling straight down the track. The challenge here is to drift until you're aligned with the ramp on the grass to the left 2. You should be able to Mini-Turbo off this drift. Ideally you are aimed perfectly straight at the ramp.

Boost with a Mushroom across the grass, avoiding the ramp and aiming to collect some Coins on the track beyond it. Make sure you don't hit the wall on the left side of the track.

Next, avoid going onto the wall on the right, and drift and Mini-Turbo on the ground level, hugging the wall as best you can. As you exit the turn, dive into the water at the center of the course to collect two of the Coins there. On later laps, the glide ramp over the water in the center of the next area will be opened by stone rollers, and will be a straighter, faster route.

The underwater section of the course is actually faster than the wall rides on either side of the track. You can snag two Coins on either side of the central platform, and score a Jump Boost as you hit the edge of the stairs while exiting the water.

Drift through this cave, hugging the turn as close to the wall as possible. You can make up for passing these Coins later.

The next few turns can and should be drifted and Mini-Turboed through as tight to the inside as possible, while avoiding the Thwomps. Your entire goal in this section is to set yourself up to use another shortcut.

Take this stone ramp as opposed to taking the much wider route to the right of it. Jump Boost off the ramp, which should carry you to the glide ramp on the main track.

You can get one last burst of speed by Jump Boosting off one of the ramps on the hill facing the finish line. Time your landing and jump off the ramp right—you'll be able to glide farther.

Video is restricted

Roadside Unassistance

Piranha Plants: Pipes litter the sides of certain parts of the course, and Piranha Plants infest them. Be mindful just how close you are to them when drifting. If you don't see the plants, it's safe to be near the pipes.

Nintendo's Best Time Trial: 1:52.017

Glider:
Browser
Kite

Remember, hitting the glide ramp after using a Mushroom to boost through the sand is actually slower than just driving on the ground towards the finish line! If you do hit it, get on the ground as quickly as possible, making sure to evade the Goomba Towers.

Video is restricted

The New Tracks
Toad Harbor

A statue of Princess Peach looks over the bustling **Toad Harbor** as racers tear through the docks, markets, and side streets as they jockey for first place. Racers can choose from multiple paths throughout the harbor, which can make things complicated as racers start spewing **items** all over the course to stop each other!

Roadside Unassistance

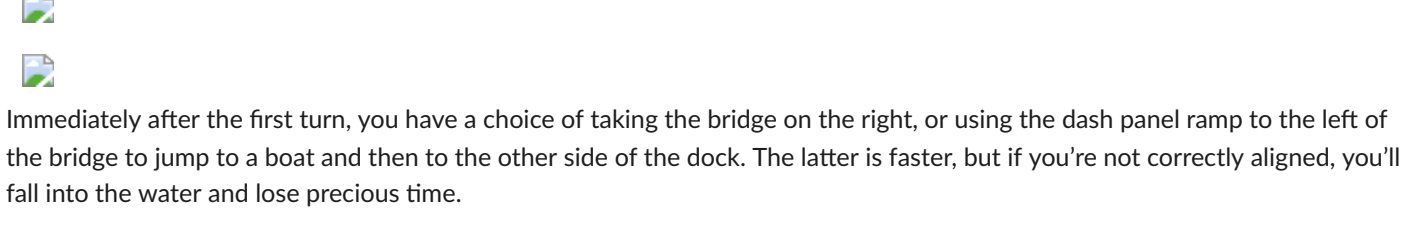

Trolleys: Throughout the last third of the course are multiple trolleys. Nothing short of ramming them with an active Super Star can get them out of your way!

Racer: Wario	Body: Sport Bike	Wheels: Cyber Slick	Glider: Parafoil

Grand Prix

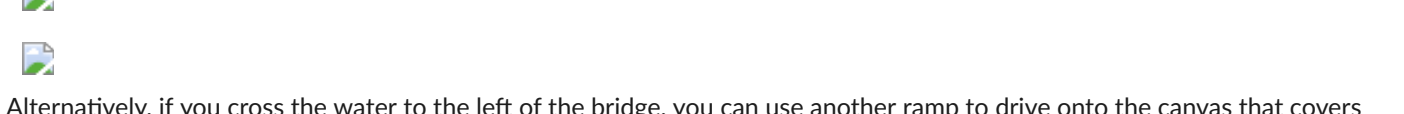

Turn 1 can be cut across by using a Mushroom to blast over the grass and through a set of cargo crates.

Tip

The dash panel ramps here can be Jump Boosted. However, it is possible to overshoot the ramp on the boat if you pick up too much speed!

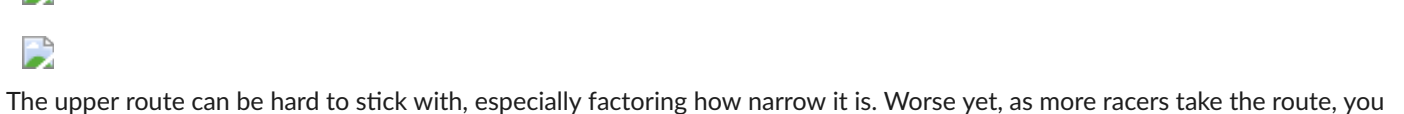

Just past the bridge, you drive through a market. There's a lot of stuff to get stuck on, with support pillars for the canvas rooftops being among the worst.

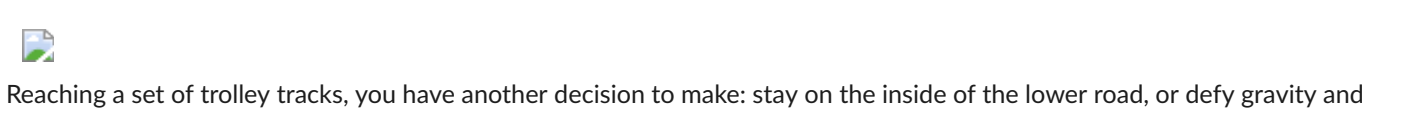

Alternatively, if you cross the water to the left of the bridge, you can use another ramp to drive onto the canvas that covers much of the market, which will put you in a better position for the next section. Take advantage of the ramps and ramp-like **terrain** of the canvas by using Jump Boosts every chance you get!

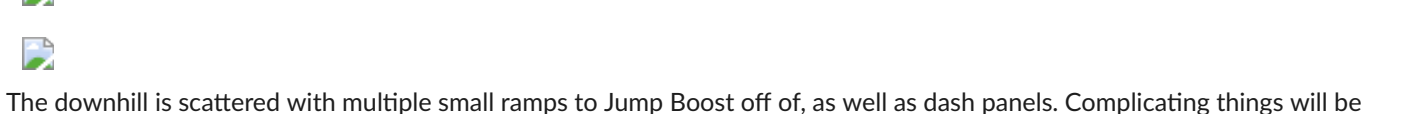

The market curves to the right and the road both narrows and offers another split decision. The lower level is a bit wider but can be the slower path to take with all the curves.

The upper route can be hard to stick with, especially factoring how narrow it is. Worse yet, as more racers take the route, you can expect Bananas galore, and there's not a lot of room to drive around them. Fail to keep up speed and you won't make the jump halfway through the upper route and instead will fall to the lower road.

Reaching a set of trolley tracks, you have another decision to make: stay on the inside of the lower road, or defy gravity and ride the wall on the right. The lower path is technically shorter and lines you up on the upcoming downhill a little easier. The wall ride can be made faster by using Jump Boosts off of every ramp and bump on the wall.

The downhill is scattered with multiple small ramps to Jump Boost off of, as well as dash panels. Complicating things will be trolleys, which move at their own pace and are not concerned with your desperate race to the finish.

The bottom of the hill provides yet another split decision. You can follow the obvious main road, taking the full brunt of the long hairpin turn. Alternatively, you can use the winding side alley on the left side of the downhill to better align a straighter shot to the finish line. The latter can be tougher on heavier, less maneuverable racers, as one miscalculation will cause you to hit the wall and lose out on any benefit from this shortcut.

The trolley tracks run behind a wall to the right of the final stretch to the finish line. It is possible to race down this narrow passage during the first two laps to cut down on time, assuming there isn't a trolley in your way.

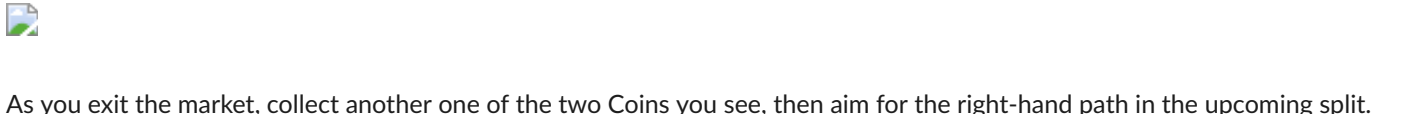

Time Trial Mode

After the first hard right, immediately align yourself for crossing the water to the left of the bridge by using both dash panel ramps. Try collecting at least one Coin hovering on the boat ramp, while also aligning yourself for the wooden ramp that takes you on the canvas shading the marketplace.

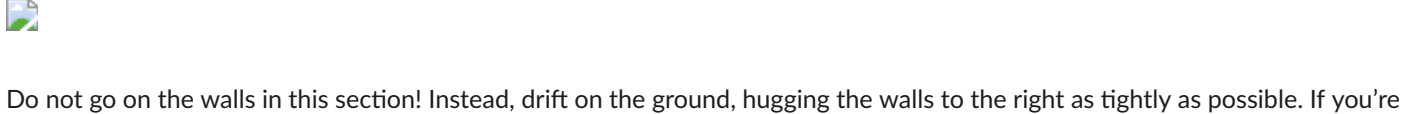

Collect the two Coins on the wooden ramp, and then Jump Boost off the ramp to the right. You want to try to hug the inside line of the market as much as possible, while avoiding things that can slow or stop you.

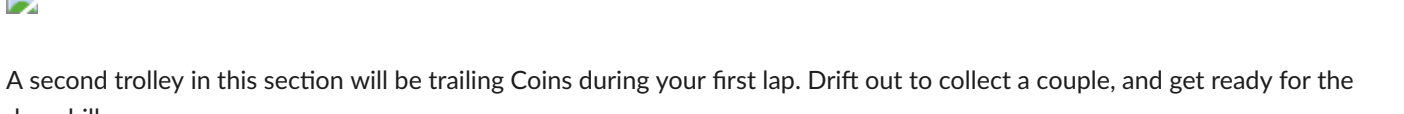

As you exit the market, collect another one of the two Coins you see, then aim for the right-hand path in the upcoming split. Drift the whole way up that curve, and release a Mini-Turbo just as the track straightens to boost towards another dash panel ramp, collecting the two Coins in front of it. Try to hit the ramp more on its left side, while aiming at the upcoming alley.

This alley is tough to navigate at speed, but vital to do so if you're serious about breaking records. Drift through this alley while turning to the right. With enough speed, you can score a Mini-Turbo, so if you do manage to hit the wall on the left, you can boost away and maintain some of your speed on the uphill.

Do not go on the walls in this section! Instead, drift on the ground, hugging the walls to the right as tightly as possible. If you're on pace, you'll have to drift to the right of at least one trolley while avoiding grazing the wall.

A second trolley in this section will be trailing Coins during your first lap. Drift out to collect a couple, and get ready for the downhill.

The downhill part of the course will have trolleys running down it during every lap. On Lap 1, you should concentrate on driving straight down the hill, collecting Coins to try and reach ten. On future laps, you use the dash panel ramps on the left side of the track to speed down the hill quickly.

The place to use a Mushroom is at the bottom of the hill, cutting across the grass to hack away a good chunk of track and being that much closer to the finish line!

The New Tracks
Shy Guy Falls

Have you ever wanted to race up and down waterfalls located deep within a Shy Guy mountain commune? Of course you have! Shy Guy Falls provides for this very specific desire. The **Flower Cup** finale is no slouch, being one of the fastest tracks in the entire game. Dash panels galore fill this course, and the best racers will take full advantage of them.

Roadside Unassistance

There no special hazards on Shy Guy Falls, beyond falling off the course. Of course the competition does its best to make that happen.

Kart of Champions			
Nintendo's Best Time Trial: 2:08.775			
Player: Jeff C. M.			
Racer: Wario	Body: Sport Bike	Wheels: Cyber Slick	Glider: Parafoil

Grand Prix

The middle of the opening S-curve is lined with Coins on the inside and outside racing lines. Hopefully, you'll start this track at or near the front of the pack so you can snag at least a few before the rest of the pack reaches them.

Exiting the S-curve, you'll see a gap across a waterfall that you can clear with the dash panel ramp. Don't try anything too fancy —you're defying gravity at this point and a mishap can send you into the water! More Coins line the left turn just after the jump.

Jump Boost off the ramp onto the waterfall, aiming specifically for one of the dash panels that are flowing towards you. You want to hit as many panels as possible, and the COM racers will definitely be doing the same! This is a good spot to wreak some havoc with Green Shells, if you've got 'em.

After the first waterfall, drift through the hairpin left and align yourself to go down the second waterfall. Racers have so much speed going into this section, particularly on 150cc or Mirror Mode, that you'll have a lot less time to react to **items**.

The ramp at the bottom of the second waterfall sends you flying across a chasm towards the final portion of the course. You have a choice at this point: aim for the lower route, or risk the trickier upper path to have a slight positional advantage.

The major shortcut of this course is very easy to miss. Just past the short split in the road, on the right side of the track, you might notice a pair of stone spires. This marks a grassy path that requires a Mushroom to propel you across a gap to cut past a much longer Turn 7. If you don't have the means to use the shortcut yourself, set Bananas near the approach to it and hope for the best.

Some time can be made up on the turn next to the shortcut by Jump Boosting off the ramps. After this there's just one last right turn before you sprint to the finish!

Time Trial Mode

The opening S-curve is a gentle opener to the rest of the trial. Stick to the inside line and make sure you collect the two Coins at the second half of the S-curve.

The dash panel ramp that launches you over the waterfall has a pair of Coins. Collect these Coins and line up for the approach to third Turn 3. If you want to snag four Coins, drift on the outside line of the turn. For later laps in the trial, stick to the inside.

The ramp that sends you up the waterfall can be Jump Boosted, while the waterfall itself sends plenty of dash panels your way. Don't maneuver too much, and concentrate on hitting as many of the panels as possible to keep your speed high.

Stick to the inside of this turn that will send you plummeting back down another waterfall, collecting two more Coins. Another Coin awaits at the bottom of this wooden path just before you land back on the water.

The bottom of the waterfall has a glide ramp with even more Coins. It's possible to snag a tenth Coin here on Lap 1!

The short flight from the waterfall gives you two paths to choose from. Aim for the upper route, cutting close to the wall on the left to avoid landing in the rough grass on the right side of the cave so you can maintain speed. You can Jump Boost off another ramp for more speed—just be sure to land on the road below!

This shortcut is hard to see if you're not paying attention. Look for two stone spires on the grass to the right shortly after dropping down from the cave. Mushroom boost between them, then Jump Boost off the grass and prepare to turn sharply to the right to stay on the course. If you mess up here, you'll go flying off the side of the track! Your three Mushrooms should be used exclusively for this shortcut.

The New Tracks

Sunshine Airport

Star Cup opens with a rip-roaring race through Sunshine Airport. Blitzing under and through airplanes on the course, racers will be launched into the sky on dangerous fly-bys past passenger jets. The greatest danger here is the massive glider sections of the track, a source of grief to drivers caught in mid-air by Lightnings, Red Shells, and Spiny Shells.

Roadside Unassistance

The Gaps: There are two extended flights during this race, both of which are moments of extreme vulnerability to attack. Getting hit here will cost you a lot of time, and possibly the entire race!

Airliner: Certain racers and vehicle configurations can get a lot of altitude during the second flight, which is all well and good until an airliner almost smacks into you. Don't be surprised by something this big!

Spin Boost Pillars: The portion of the track in between the two flying sections is dotted by these pillars. They can help propel you forward, but hit them at a bad angle, and you might get sent off the track!

Shipping Crates: Conveyor belts are moving crates through key locations on this course, which can really slow you down if you're not heavy enough or fast enough to punch through them.

Kart of Champions			
Nintendo's Best Time Trial: 2:08.177			
Player: Jeff C. M.			
			
Racer: Wario			
	Body: Sport Bike	Wheels: Cyber Slick	Glider: Parafoil

Grand Prix

The first left drops you out of the terminal, and you can Jump Boost off the ledge for some extra speed. Right away you'll encounter crates on conveyor belts. So long as you maintain speed, you can punch through them with minimal loss of momentum. You can also Jump Boost off the conveyor belt.

Passing under the airliner, a dash panel ramp will launch you onto an elevated part of the course. Don't fall to the lower area as you navigate the sharp left here. Recovering from this will take a lot of time if you don't have a Mushroom. This spot can be a very tough section to navigate as the race progresses. Expect multiple Bananas to be set here.

If you stayed on the upper platform, you can actually launch onto the wing of another airliner and race over and through the plane. This is arguably the fastest route, though with Mushrooms you can cut underneath the plane, across the grass on the right side of the track.

Taking this left turn wide can earn you some Coins. Set up Bananas there as well, to make life harder for racers behind you.

Alternatively, there's a shortcut on the inside of this turn: a small ramp in the water that, combined with a Mushroom, can save some time. It is a very risky shortcut to attempt on higher difficulties!

The first flight comes after a series of dash panels and a ramp, launching you far over the water to an antigravity section of the course. If you're lagging behind and have a Lightning, a mean trick is to use it just as the leaders are flying across this gap.

The track after the first flight is a long right-hand curve, with Spin Boost pillars placed throughout it. If you hit a pillar, and ram another racer, you gain a useful burst of speed. Just be careful you don't fall off here—there's no railing to save you on the inside of the track!

The second flight grants you more control than the first, letting you steer to collect groups of Coins. An airliner occasionally passes through this area, and you can snag even more Coins if you pass close enough to it.

The final turns lead back into the terminal. You can use Mushrooms to boost cleanly through the cargo conveyor belt and the crates on it. Don't miss a chance to Jump Boost off the conveyor belt ramps as well!

Time Trial Mode

The S-curve right at the start of the course is run fastest by taking as straight a line through it as possible, only drifting left as you approach the exit to the terminal.

There are five Coins under the first airliner you drive past. You can collect two Coins during the first two laps. Another pair of Coins are on the raised section of track just behind the airliner, though only one can be reasonably collected during a lap.

Don't actually race across the airliner! It's faster to spend a Mushroom to cross the grass on the ground to the right of it. If you choose to save the Mushroom for later, cut the turn as close to the grass as possible.

If you don't cut across the grass to the right of the airliner, you can use a Mushroom for this short cut ramp across the water. It does cost you a chance at some more Coins.

While on the antigravity portion of the track, you can try to hit at least two Spin Boost pillars while taking advantage of the gentle curve of the track to score multiple Mini-Turbos off drifts. Stay on the inside of the turn as much as possible, ignoring the Coins. You can make up for them later.

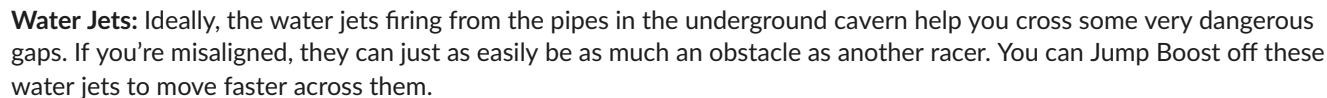

The flight down from the sky passes by two clusters of five Coins. Aim for the landing zone in the distance so you can have good speed heading into the final stretch.

There's no reason why you shouldn't use this final shortcut. It doesn't even require a Mushroom! Just make sure you avoid the crates as you Jump Boost off the conveyor belt.

Grand Prix

The shortcut used by some during the **Grand Prix** is essential for a fast **Time Trial** here, and you'll need to use it for every lap. As you land from the short glider trip, turn left and align yourself to the rocky ground to the right of the actual course, and aim straight for the finish. Cut loose with a Mushroom the moment your front wheels hit the rocks, and jet to finish line!

Video is restricted

The New Tracks

Electrodrome

The thumping beat and flashing lights clash with this surprisingly relaxing course. Electrodrome is a fairly wide open track for the most part. Exploit each curve, drift often, and fire off as many Mini-Turbos and Super Mini-Turbos as possible.

Roadside Unassistance

Raving Piranha Plants: You'll find these occasionally inside pipes at certain corners of the course. Keep an eye out and make sure you don't get too close to them.

Spin Boost Pillars: As usual, make sure you don't spin yourself into a wall or off the track entirely if you intend to use them.

The Rough: Dark, yet shiny patches of the course like the one shown will slow you down quite a bit unless you use a Mushroom to boost through them.

Kart of Champions		
Nintendo's Best Time Trial: 2:07.774		
Player: Jeff C. M.		
<div><div></div><div></div></div>		
Racer: Wario	Body: Sport Bike	Wheels: Cyber Slick Glider: Parafoil

Grand Prix

The track begins with a flight over a chasm. When taking on the left turn that follows, avoid going into the rough part of the track unless you have a Mushroom. The glowing road cones here are harmless.

This section is fairly straightforward antigravity driving along the walls towards a split in the course. It's a long straightway, and the potential for getting smacked by shells is high. The course is wide enough that it is possible for some characters to be able to pull off Mini-Turbos while still traveling more or less forward, but it's tough to pull off.

Don't miss these Spin Boost pillars for a quick boost in speed!

The split in the course is marked by a Spin Boost pillar. Neither path has a truly distinct advantage, though if you're falling behind, you might want to take the same track as the leaders for a chance to smack 'em with some shells. Beware of the pillars in these sections. There aren't many, but hitting them at the wrong angle might send you off the track.

The last turn for the split course sections is a chance to score multiple Super Mini-Turbos. Don't just settle for a clean single drift through the whole turn. This is one of your best chances to shrink an opponent's lead, or extend yours!

The split tracks eventually rejoin, launching players across another chasm to the final big turn of the race. Piranha Plants infest the pipes on the inside of the turn. If you have a Mushroom, you can cut past the pipes and through the rough for a straighter shot at the finish line.

Time Trial Mode

After gliding away from the start line, collect some Coins from the M-shape at the landing point.

The first turn to the left has some Coins to collect, but at most you can probably only snag one per lap, and it's faster to stick to an inside line through the whole turn. You can collect more Coins later.

After crossing onto the antigravity portion of the course, you can collect more Coins on your way to the split in the track.

The pink side of the split track is slightly faster, as it ultimately ends on the "inside" of the final turn before the tracks rejoin at the glide ramps. However, you can get closer to ten Coins sooner by taking the green side, as there are more Coins that can be collected at first.

When gliding down from the split track section, don't miss out on a chance to collect some Coins from the rotating ring of them at the landing point, but also don't go out of your way to collect them if it's going to slow you down more in the end.

The shortcut across the rough part of track on the left will take you past pipes, including some that are occupied by raving Piranha Plants. A Mushroom is required for this shortcut, but it is possible that the boost can fade out before you make it entirely across the rough ground! Don't get too greedy when trying for this shortcut.

The New Tracks

Mount Wario

Mount Wario isn't like other tracks in this cup. Rather, it is one long road split into three sections, each filled with danger. It's literally all downhill from here when you start! Remember, you only get one shot at performing well in each section. If you mess up early on, you'll have to make up time as you keep going further down the mountain.

Roadside Unassistance

A Distinct Lack Of Guard Rails: The first section of this course has next to no safety net on the sides of the track, so be careful when taking the turns here. Falling off early can cost you the whole race. Don't let that happen!

Slick Ice: The first section of the course is on ice, and it's possible to be sent flying off track if you take your turns too wide.

Wario Dam: Water flowing down the dam can push you away from vital dash panels.

Trees: The latter portion of the second section is filled with trees, both standing and lying down. You can Jump Boost off the fallen trees for some speed, but the standing ones will stop any racer dead in their tracks.

Kart of Champions

Nintendo's Best Time Trial: 1:53.516

Player: Jeff C. M.			
Racer: Wario	 Body: Sport Bike	 Wheels: Cyber Slick	 Glider: Parafoil

Grand Prix

You start the course by diving out of an airship—don't forget to Jump Boost off the lip of the starting ramp. Note the lack of protective fencing along the sides of the course. This is how much of the first section is.

The course turns icy just as you reach the first real turn of the race, a sharp right. Stick to the inside as best you can. There's a ramp you can Jump Boost off of for additional speed, and to align yourself to the upcoming turn.

Shortly after the first split is another on a hard left turn. The outside line has dash panels and Coins, so if you're out in the front of the pack, consider taking the longer outside path just to deny your rivals some Coins!

The first section of Mount Wario ends with a final hairpin to the right. Start your drift early to make it easier to take the turn. If you're a heavyweight racer and you're in the middle of the group, this turn is your last chance to ram other racers off the course. Take advantage of that if the opportunity presents itself!

Section 2 begins by entering a massive cave. When you're presented with a chance to jump off a regular ramp, or use a blue ramp to start gliding, take the blue ramp. If you have a glider part that grants you good speed, it'll be much faster than dealing with the rougher **terrain** on the ground.

If you've chosen to glide, you can extend your air time by force landing on this dash panel ramp, and jumping just as you land. This grants you the boost, and keeps you gliding.

Wario Dam is your next stop as you take the winding track out of the caves. Water flows pour down the side of the dam, carrying dash panels with them. Try to aim for some of them, while making sure you aim at the tunnel that will take you away from the dam.

As you exit the dam, you reach a snowy forest, with two obvious paths to choose from. If you have a Mushroom, you can bypass the trees and get through the rough snow to use another blue ramp to glide straight into the next area.

Use these logs to Jump Boost for a little extra speed, but beware of being sent flying into trees, and be ready to handle the upcoming section filled with trees during the long turn to the right.

The final course section begins with some ramps to Jump Boost from, followed by a series of winding turns to slalom through.

The moguls just past the first series of turns can all be used for Jump Boosts. Get as many boosts as you can!

The home stretch begins at the top of one final hill filled with dash panels to hit. The hill ends with a launch panel that sends you gliding towards a set of rings—make sure you pass through them all! If rivals are close by, be ready to evade Green Shells. If you have a Banana, hold on to it for defense during this section.

As you land from your glider flight, there's one last S-curve you have to deal with at the bottom of the hill. If you have held on to a Mushroom up to this point, you can cut this corner for a straighter shot at the finish line.

Time Trial Mode

Right after dropping from the airship, it seems obvious to collect the three Coins on the track. Instead, collect only the one in the rear while boosting over the rough **terrain**, aiming for the ramp at the center of the track just ahead. The ramp itself has another Coin you can collect.

There are four Coins on the outside track of the first major turn here, but the ice makes it tough to collect them all. It's best to just cut the corner tight on the upper path, and Jump Boost off the ramp to save time.

Here is another split in the track, with four more Coins on the longer upper route. However, the dash panels there can offset the time difference between the inside and outside lines, and you need the Coins after passing up so many others.

This is a surprisingly tricky transition from the dash panels and ramp from the second turn onto a straightaway. You'll want to already be drifting to the right so you can Mini-Turbo to safety if necessary.

Another tough turn, back to the right. Four more Coins line the center of the track, though once again the ice will be working against you. It might be faster to skip the Coins on this turn and stay on the inside of the track.

Stay centered as you enter the cave for the second track section to collect four more Coins. It is entirely possible to be at ten Coins at this point in the **Time Trial**.

Take advantage of the dash panel ramps inside the cave in order to maintain your speed, and Jump Boost off any ledges or ramps to drive over.

When driving along the walls of Wario Dam, make sure you start high on the dam to catch the dash panels on the waterfalls as you drive towards the exit of the dam. Ideally you can catch a boost on three panels.

After exiting the dam, don't miss a chance to use a Mushroom to climb up this hill behind the trees so you can use a glide ramp to bypass more complex parts of the course. Just watch out for trees as you glide back towards the ground!

When racing past these logs, start guiding yourself towards the right side of the course. Cutting the next turn leading into the third and final section of the course will require some very precise driving and drifting between trees in order to avoid getting stopped cold!

The downhill slalom is best navigated by trying to keep tight inside each turn. If you drift out too wide, you'll lose time even with a Mini-Turbo.

Jump boost on every mogul you can on the way down towards the final stretch. Just be sure you don't ignore the upcoming turns that follow!

You need to hit seven dash panels on the way down towards the final glide ramp if you want to keep a good pace. After gliding through the rings, get back down to the snow to prepare for the final shortcut!

Mushroom boost across this snowy hill to cut one last corner and drive on towards the finish line!

Video is restricted

The New Tracks

Cloudtop Cruise

The **Special Cup** opens with a very fast course. Cloudtop Cruise rewards racers who are aggressive in their execution of Mini-Turbos off any turn, and Jump Boosts off of anything that can trigger them. At 150cc and Mirror settings, this is easily one of the fastest courses of all sixteen brand-new tracks, and it rewards the most aggressive drivers.

Roadside Unassistance

Barrels: Surprisingly sturdy, Barrels on the deck of the airship can impede your progress heavily, but can also protect against incoming Red and Green Shells.

Lightning Strikes: During one portion of the track, lightning will strike alternating sets of dash panels, telegraphed by a glowing light above the panels about to be struck. Avoid the lightning by trying not to drive over the panel about to be struck.

Kart of Champions			
Nintendo's Best Time Trial: 2:11.595			
Player Jeff C. M.			
<div></div>			
Racer: Wario	Body: Sport Bike	Wheels: Cyber Slick	Glider: Parafoil

Grand Prix

A dash panel ramp launches you onto a bounce pad as the track begins. You can score Jump Boosts both off the ramp itself and the bounce pad.

The upcoming turns right after the first bounce pad can be raced through like normal, however there is another bounce pad that can be used if you take up a proper racing line, aiming for it and the section of track beyond. Scoring another Jump Boost here, and off the ramp that follows, is a good way to stay ahead of the pack.

After a sharp right turn, you're dropped onto an airship with two paths around the central propeller. Neither path is particularly faster. Both feature Barrels that can slow you down if you don't have the speed or the assistance of **items** to break through.

At the bow of the airship is a cannon that shoots you through the clouds to reach another section of the course. Dash panels litter the track, and you want to use these. However, lightning strikes these panels in an alternating pattern. Watch for a strike to start building up so you can avoid that panel altogether.

As you shoot out of the clouds, the final turn leading to the finish line can be seen. More importantly, there's a pair of leaves to the right of the track, suspended in mid-air. You can use these leaves to cut that corner. Be VERY careful using that shortcut if other racers are around. If you're a lightweight racer and make contact with someone heavier, you'll fall into the abyss!

Time Trial Mode

Jump Boost off the dash panel ramp and the bounce pad right after the race starts.

The follow-up S-curve lines you up for the first major shortcut of the race. Collect the two Coins on the inside lines of the S-curve while making tracks for the short cloud ramp that launches you onto another bounce pad. Drift aggressively through the S-curve to try and score Mini-Turbos in between collecting the Coins, and make sure you Jump Boost off the cloud ramp, the bounce pad, and the ramp that you land on beyond the bounce pad.

Just past the gauntlet of Jump Boosts is another sharp right. You have a choice of drifting on the outside of this turn to collect three Coins, or cutting the corner close and snagging only one Coin on the inside line. Be sure to Jump Boost off the ramp that follows!

The track split on the airship contains Coins on both sides. For Lap 1, take the right side split to pick up two more Coins. Drift and Mini-Turbo through this turn, then do a drift and Mini-Turbo hard to the right to launch yourself forward towards the cannon at the front of the ship. For the right route, you can collect one Coin while sticking to the inside line. Take this route for future laps.

After getting launched into the clouds, you must use the dash panels to speed through this section while also avoiding the lightning that strikes them. However, during Lap 1 you'll want to favor the far left side of the track to collect two more Coins. This will cost you some speed as you'll miss dash panels to collect both Coins, but you can make up for this using a Mushroom in between panels. You can use two Mushrooms on Lap 1 to ensure you collect two Coins, saving a third Mushroom for the final lap.

The final shortcut is absolutely required to score top lap times, and contains one more Coin for your trouble. When hopping from each leaf, be sure you Jump Boost, and when leaping from the second leaf, make sure you're lined up with the finish line!

Video is restricted

The New Tracks

Bone-Dry Dunes

Desert sands and ancient skeletons make up most of this course. When playing in the **Grand Prix** mode, be on the lookout for heavyweight racers if you're a lightweight character. One wrong bump can send you into a wall, or into the sands off-road, the latter of which takes more time to recover from.

Roadside Unassistance

Bone Piranha Plants: Various points of the course are protected by these skeletal monsters. They act the same as other varieties of Piranha Plant. Stay far enough away, and they can't hurt you.

Dry Bones: These former Koopa Troopas serve their master, even from beyond their final resting place.

Nintendo's Best Time Trial: 2:02.028 Player: Jeff C. M.

Racer: Wario	Body: Sport Bike	Wheels: Slick	Glider: Parafoil

Grand Prix

1

2

3

Be aggressive in these opening turns and go for multiple Mini-Turbos. If you're lucky enough to have started at or near the front of the grid, you can reach Item Boxes early to deny at least one or two racers valuable weapons. Spectators in sandships will toss Coins onto the track, so be sure to collect the Coins if you're out in front!

4

The patch of sand at the center of this oval can be blasted over with a Mushroom. Be sure to Jump Boost off the ramp at the end of the sand!

5

After crossing the bridge, you can choose a lower road or an elevated road. In both Time Trials and the **Grand Prix**, there's not much call to take the higher road unless the lower route is rendered completely unsafe by Bananas.

6

7

A split in the road protected by a Bone Piranha Plant leads directly to the major decision point of the race. On the right side of the track behind the Piranha Plant you can see an antigravity panel that will take you on one route, while passing that ramp and following the main road leads you to another section of the course.

8

9

Taking the antigravity panel puts you on a bone road filled with Spin Boost pillars. Take advantage of the speed boosts they can provide, and don't miss scoring Jump Boosts off the ramps here. Eventually a launch ramp will send you flying over a chasm.

10

The lower route is not quite as fast as the bone road, and is guarded by multiple Bone Piranha Plants. However, with the use of a sand geyser in the chasm following this section of the course, you're in better position to reach a more advantageous route.

11

12

Beyond the chasm is a cave with two routes to drive. The first and most obvious route is the one on the ground level. If you followed the bone road, or get a boost off the sand geyser that spouts at the center of the chasm, you can glide up to the upper route.

13

14

The lower route in the cave is protected by a trio of Dry Bones. If you have a Mushroom, you can bypass the Dry Bones and a good chunk of the last turn towards the finish by rocketing off road to the left of the Dry Bones, aiming towards the finish line. Watch out for obstacles off road that can slow or stop you when using this shortcut!

Time Trial Mode

1

2

3

Drift and Mini-Turbo through the opening S-curves. As you approach the split in the track on Lap 1, airship passengers will toss three Coins onto the approach to the left track. On Lap 2, three more Coins will be tossed onto the approach to the right track.

4

5

After the split tracks rejoin, you have a hard right turn, followed by hard left. The left leads into a ramp you can Jump Boost from over a bridge. You can collect at least one Coin from this ramp, through we recommend sticking to the right side of the bridge jump if possible, to better line you up for the next turn.

6

After the bridge jump, the track splits again into upper and lower routes. Take the lower route and stick to the inside of the turn as best you can!

7

8

The track splits again shortly after the first split, this time with a choice to go left or right around a Bone Piranha Plant, each path with three Coins to collect. The inside route is slightly faster, but it is much harder to make the right turn onto the antigravity panel for the next course section. The outside route works best both for collecting Coins and aligning for the antigravity panel.

9

10

The next track split isn't even an option: the antigravity panel will take you on a section of the course with multiple Spin Boost pillars for additional speed boosts. If you stick to the center of this route, you can collect three Coins and hit most of the pillars with the sides of your vehicle.

11

12

As you fly across the chasm from your wall ride, you can still aim to reach the upper route if you launch from the far right side of the glide ramp. The turn is much easier from there, and allows for a Jump Boost. If it looks like you're not going to make it, dive for the lower route and get ready for a very sharp left turn.

13

14

The upcoming stretch is guarded by two Dry Bones. Avoid them, and line up for this final shortcut between two bone piles to the left of the course, using a Mushroom to keep up your speed. This'll help bypass the final turn and put you on a straighter line for the finish!

Video is restricted

The New Tracks

Bowser's Castle

As one would expect of Bowser, his castle is filled with all manner of obstacles meant to interfere with plucky plumbers and kart racers alike. Higher-difficulty races through this course can be extremely challenging, as you'll be fighting the course almost as much as you'll be fending off the **items** from other racers!

Roadside Unassistance

Laser Statues: While not active during Lap 1, the last two laps activate Bowser statues that fire lasers onto the track.

Fire Bar: Certain gaps and sections of the track are protected by rotating fire chain traps. Anticipate where the fire chains will be and position yourself to drive where they won't be.

Lava Geysers: The last major jump of the castle is over a chasm where lava geysers will shoot up from the depths. Pay attention to your height and avoid contacting them!

Bowser Monument: This massive centerpiece monument is alive! It punches at the course, sending shockwaves through the track.

Ball and Chain: The ball and chain swings over gaps. If you hit the ball straight on, you'll be brought to a halt!

Rolling Boulders: Near the end of the course, boulders begin to roll downhill towards you.

Nintendo's Best Time Trial: 2:15.686Player: Jeff C. M.

Kart of Champions			
Nintendo's Best Time Trial: 2:15.686			
Player: Jeff C. M.			
   			
Racer: Wario	Body: Sport Bike	Wheels: Slick	Glider: Parafoil

Grand Prix

Jump Boost off the bridge leading into the castle itself. The corridor beyond will have multiple laser statues, but they are only active on Laps 2 and 3.

The first Fire Bar trap comes after a set of hairpin turns. You can Jump Boost off the ramp in front of the fire chain to help speed past it. The track just before any given trap is prime territory to set Bananas and force racers to take potentially unsafe paths to avoid your **items** and the traps!

Make sure you align with the next part of the track after slipping past the fire chain. A similar setup awaits with a ball and chain. Touching it even slightly will cause you to spin out and lose Coins!

Another hairpin turn is just past the ball and chain, leading to another ramp and another Fire Bar trap.

The course splits into two antigravity paths, with the Bowser monument punching away at both. You can Jump Boost off the undulating portions of track, sometimes repeatedly when you're driving away from the statue. Just make sure the monument doesn't flatten you with its fists!

Regardless of your chosen path, both will launch you across a lava chasm. Make sure you don't stray too low so you don't hit the lava geysers, or fail to make the jump entirely!

The last part of this course is a long right turn going uphill, while boulders roll down the hill. As you reach the end of the climb, you can choose to stay on the inside track, or take a raised part of the track for another ramp to Jump Boost off of.

You can also cut a good chunk of the inside track by using a Mushroom across a portion of rough dirt on the right side of the track.

Time Trial Mode

On Lap 1, the laser statues are inactive and the first turn to the right can be easily navigated to collect three Coins while drifting on through. Three more Coins can be found in the middle of the track on the second turn to the left.

After a relatively simple S-curve, you have to navigate the Fire Bar/ball and chain gauntlet. Stay focused on the road ahead so as you slip past the traps (while Jump Boosting off the ramps in front of them), you're aiming yourself towards safe racing lines.

This long turn to the left has four more Coins to collect. Try to snag 'em all on Lap 1, and on future laps cut this turn as tight as you can to the left side of the track. Be ready to avoid the upcoming Fire Bar trap!

The split routes around the massive Bowser monument can be exploited for multiple Jump Boosts just after the monument punches them. Jump at the peaks of the hills rolling along the track. If you managed to catch up to the shockwaves going in your direction, you can even score multiple Jump Boosts! There are two rows of three Coins that you can collect from on each route.

Be careful when gliding across the chasm here. Lava geysers will knock you out of the air if you're too low. Try to center yourself with the track as you finish crossing the chasm. There are three more Coins to pick up if you need them.

Cut across the rough **terrain** at this corner with a Mushroom to save some time. It also helps to be drifting to the right as you shoot over the rough ground to align yourself with the line of Coins headed uphill. Watch out for boulders rolling at you!

In the final stretch, the S-curve to the right of the ramp is actually faster to race through.

Video is restricted

The New Tracks

Rainbow Road

Racing in low orbit is a fitting way to end the **Special Cup**. In what has become a Mario Kart tradition, many long stretches of Rainbow Road have no protective walls. Combine that with the slippery antigravity sections of the track, and you can be in for a rough race, particularly on higher difficulties.

Roadside Unassistance

Satellite Conveyor Belts: Part of the race takes you through a space station with conveyors that alternate in the direction they travel. Watch the arrows, and only drive on the belt that is helping you move forward.

Kart of Champions		
Nintendo's Best Time Trial: 2:15.895		
Player: Jeff C. M.		
		
Racer: Wario	Body: Sport Bike	Wheels: Slick Glider: Parafoil

Grand Prix

The first two big turns can be a doozy. The antigravity panel before it makes your controls more slippery, and there's no retaining wall throughout the turns. Watch your flanks when passing through this turn—a rival racer can send you off the side!

A glide ramp sends you flying towards the space station. Don't miss collecting some Coins while in mid-flight.

The conveyor belts inside the space station will change their direction with every lap. Stay on the belt with green arrows pointed in the direction you need to go.

Dash panels will propel you towards one of two glide ramps leading to alternate roads to follow. You can adjust what road you follow, but the rings around the glide path will try to force you onto a designated route.

The split roads have no walls for the majority of their length, and are dotted with Spin Boost pillars to boot. Always know if you've got racers close by. During harder-difficulty GP races, these two paths can be a boulevard of broken first-place ambitions. It's very easy to get knocked off!

An amazing shortcut is available if you take the right-side glide ramp onto the lower route of the split course section. Marked by a lone Spin Boost pillar, if you drive straight off the track behind the pillar, you'll land on another piece of the track looking right at the final hairpin of the track, and you'll have cut a good chunk of the course to boot! No Mushroom is required for this stunt.

The final hairpin turn before the finish is a doozy. If you're not in a particularly maneuverable vehicle, sticking to the inside line might be hard. You can drift further to the outside and use the dash panels there to make up for taking the longer racing line. Whatever you choose, if you have Bananas, this turn is a particularly cruel place to deploy them, as you can easily make racers fly off the sides of the track!

Time Trial Mode

Rainbow Road Time Trials are all about getting the most out of every single drift you make and cutting your turns as tight to the inside racing line as possible. The first two turns have five Coins to collect on the inside of the track, and six on the outside. It's worth staying on the inside line for all three laps. After Lap 1, you should take these two turns with drifts that have your front wheels literally hanging off the side of the track!

For all three laps, when gliding over this chasm, try to collect at least one Coin while lining up to take on the upcoming space station.

Landing on the station near the M platform should give you another chance at more Coins. Make sure you Jump Boost off the ramp onto the conveyor belts, and aim for the belt on the inside of the right turn up ahead. If that belt has red arrows pointed at you, use a Mushroom to power through the belt.

Always choose the glide ramp on the right, as it leads to the lower route in the split course section, which also leads directly to the big shortcut of the track. Both routes feature multiple Coins to collect. By the time you get to this point in Lap 1, you should be at or close to ten Coins.

The shortcut, marked by a lone Spin Boost pillar, at the center of a curve to the right, is vital to take if you're trying to break records. As you go off the seemingly blind jump to the track below, aim yourself slightly to the left so you land on track, and not on speed-sapping rough **terrain**!

The last hairpin is tough, but for maximum speed should be taken as tight as possible on every lap in a **Time Trial**. Hang those front wheels over the edge of the course while drifting!

Returning Classics

Wii Moo Moo Meadows

Moo Moo Meadows has seen subtle changes from its debut in *Mario Kart Wii*. Most noticeably, the local Moo Moo population has increased, which makes racing through the gentle curves and hills of the meadows more of a challenge. This is a short race course, with large open spaces for drivers to maneuver through.

Roadside Unassistance

Moo Moos: These herbivores lazily wander near and onto the race track, forcing players to get creative to avoid running into them. Moo Moos can stop even the heaviest racers in their tracks, and are large enough to easily mess with your ideal racing line.

Monty Moles: These little guys burrow through the ground, occasionally leaping into the air to try and surprise you. It's possible to score Jump Boosts off of the molehill trails they leave behind while they are digging through the ground.

Kart of Champions			
Nintendo's Best Time Trial: 1:31.643			
Player: Jeff C. M.			
<div></div>			
Racer: Wario	<div><div>Body: Sport Bike</div><div>Wheels: Slick</div><div>Glider: Parafoil</div></div>		

Grand Prix

The opening left turn should give you an idea what to expect through each lap: wide open spaces on the track itself, which makes using any non-homing weapons on your rivals more difficult.

Things get a bit more interesting when you reach the field inhabited by Moo Moos. Their constant wandering makes trips through this section different with every lap, as they start crossing onto the main track over the course of the race! The winding S-curves through this field can be cut down significantly with proper Mushroom boosts across the grassy hills.

Jump Boost off this ramp for extra speed, and get ready to choose your path on the upcoming left turn.

You can choose to follow a route that earns you more Coins, eventually taking to the sky with a glide ramp. The lower, faster path denies you the ability to fly over some of the bumpier **terrain** in the section that follows.

Flying from the glide ramp gives you a chance to bypass the hilly final section of the track, avoiding pesky Monty Moles in the process. You can extend your flight by landing on another dash panel ramp at the center of the hilly mole field.

If you choose to not take the glide ramp into the air, make sure you Jump Boost off the dash panel ramp and any molehills in your direct path, but otherwise focus on avoiding patches of grass on the hill. There are many Coins scattered throughout this field, but it's not worth sacrificing speed or first place to go out of your way to collect them.

Time Trial Mode

In general, you want to take the turns as close to the inside as possible to squeeze as much time off your laps as possible. However, in your first lap you need to reach ten Coins as quickly as you can. Taking the outside line to snag three Coins just before reaching the Moo Moo field might be worth it.

The Moo Moo field has at least two good points to use a Mushroom on. The first is over a patch of grass on the right-hand side of the course just as you get past the first set of Coins to collect. Through all three laps in the **Time Trial**, this is a consistently safe route to avoid Moo Moos while maintaining good speed.

You can cut another section of the course by using a Mushroom to blast across the grass to the left of a second group of five Coins. Moo Moos tend to complicate this crossing during all three laps, and misjudging your Mushroom boost might have you lose speed in the grass if it wears out before you reach the track again.

You can Jump Boost off the ramp for Coins if you need them, but it's best to avoid it if you don't.

It's arguably faster to take the inside of this turn and avoid using the glide ramp entirely. However, with the right angle and timing, you can Jump Boost off the glide ramp, land and Jump Boost off the dash panel ramp in the middle of the last field, and extend the flight even further by Jump Boosting off a molehill!

Cut this final left turn as much to the inside as you can. Swinging out too wide can cost you precious seconds.

Returning Classics

GBA Mario Circuit

Despite the addition of antigravity panels and having an entire portion of the course lift into the sky, this returning iteration of **Mario Circuit** is still a fairly traditional course. Emphasizing the basics of Mario Kart racing, the various turns of **Mario Circuit** rewards the racer willing to cut corners tighter than the rest.

Roadside Unassistance

Oil Slicks: Oil has spilled onto portions of this course, and will cause any racer that drives over them to lose control! These hazards start the race marked by road cones, so keep your eyes open.

Kart of Champions			
Nintendo's Best Time Trial: 1:35.290			
Player: Jeff C. M.			
   			
Racer: Wario	<div><div>Body:</div><div>Sport Bike</div></div> <div><div>Wheels:</div><div>Slick</div></div> <div><div>Glider:</div><div>Parafoil</div></div>		

Grand Prix

The opening two turns can be cut heavily by boosting across the grass with a Mushroom. You won't have this at the start of Lap 1 in a race, but if you do get a Mushroom, consider holding on to it specifically to cut the first turn. It'll put you on a line to collect some Coins on your way to an antigravity panel.

Just past the antigravity panel on the mid-air portion of the course is sharp hairpin left. Keep to the inside to hit a dash panel on your way back downhill. The dash panel itself is a great location to set Bananas or to shoot Green Shells at pursuing racers who are trailing you while trying to reach the dash panel themselves!

A hairpin right comes just after returning to the ground level of the course. This turn, and the turn after it, are ripe for being cut with the use of Mushrooms to blast across the grass. However, the second of these turns is where such a tactic will be of greater use.

Off the road to the right of another cluster of Item Boxes is a glide ramp that can launch you across a good chunk of the course. You do need a Mushroom to access it, as the rough grass in front of the ramp will slow you down otherwise.

Watch out for the oil slicks marked by road cones in this section. Short of having a Super Star to plow through them unharmed, your best defense is to simply avoid them. Clever players can set up traps with Bananas that can send a rival spinning into an oil slick, costing an opponent up to six Coins for hitting both hazards!

After the final left turn leading to the final straightaway, check the right side of the track to see the entrance to a small pit area that contains an Item Box and a dash panel. With some clever drifting, you can score a Mini-Turbo before you hit the dash panel to cross the finish line. Consider dropping Bananas here to trip up your rivals.

Time Trial Mode

Arguably, it might be a good idea to start Lap 1 of your **Time Trial** by burning a Mushroom to cut the first corner. With the right angle, you'll speed across the grass and be lined up to snag some Coins for your trouble.

After getting launched up to the raised portion of the track, the hairpin has five more Coins—two on the inside line and three on the outside. For Lap 1, it may not be a bad idea to take the turn wide to collect the outer three Coins. If you cut the turn early enough after collecting the three, you can still get back to the left side of the track in time to hit the small dash panel.

Don't miss collecting one of the three Coins at the end of this dash panel ramp.

There's seven Coins to collect on this turn, but ideally you'll only collect the three on the inside of the track during Lap 1. Don't waste a Mushroom to reach the ramp on the grass after the turn!

Watch the oil slicks on the road, and collect Coins if you still need your ten. Take the most direct route through the curves leading to the final turn, with minimal turning to avoid slowing down unnecessarily. Make sure you grab the Coins here if you still need them! As you reach the second oil slick, begin drifting to set up your approach for the final left turn.

Take this last turn as tight as possible. You can also use a Mushroom to cut across the grass just to the right of the tire barrier while drifting, and Super Mini-Turbo towards the finish line.

Returning Classics

DS Cheep Cheep Beach

Cheep Cheep Beach is an even faster race course than it was when it first appeared in *Mario Kart DS*! With the ability to drive underwater with significantly fewer restrictions, this track has expanded in scope considerably, making for some very intense races during the **Grand Prix**. Shrewd racers have plenty of ways to cut down their lap times to stay ahead of their rivals.

Roadside Unassistance

Cheep Cheeps: Lurking in the waters around this tropical landscape, Cheep Cheeps will occasionally leap out of the water to try and surprise reckless, unaware drivers.

Sidesteppers: Crawling on the beaches or underwater, Sidesteppers can wander into your path and force you to pull off some creative driving maneuvers to avoid an accident.

Kart of Champions			
Nintendo's Best Time Trial: 1:57.169			
Player: Addison K.			
			
Racer: Bowser	Body: Sport Bike	Wheels: Slick	Glider: Bowser Kite

Grand Prix

When drifting through the dock here, watch out for sudden changes to the shape of the sides of the boardwalk.

The glide ramp launches you over a large stretch of deep water. Watch out for Cheep Cheeps flying through the air, and aim to land back on the beach as soon as possible to collect some more Coins.

After an easy right turn, you'll race down another section of the beach, towards a dash panel ramp and a number of Item Boxes. While you can avoid using the dash panel ramp, there's not much call to do so. Hit it straight, aiming for the curving strip of sand poking out of the water.

You have some options here. The waters to the left of the beach road have underwater ramps with Coins on them. The sand strip itself has plenty of Coins and a couple ramps to Jump Boost off of, and it can be drifted through with ease. It is narrow enough that you may be forced into the water to avoid Shells and Bananas, however.

There is also a water route you can take just to the left of this red arrow telling you to make the turn. Once under the water, a Mushroom can blast you over some rough **terrain**—a faster choice compared to drifting around it.

Sidesteppers will be crawling all over this section of the beach and in the waters to the left of it. We recommend sticking to the beach, collecting Coins and avoiding trouble with the Sidesteppers. Watch out for incoming **items**, and don't be afraid to use the trees to block incoming Shells.

After exiting the beach via a hard right turn, smoothly work your way through the S-curves before making a final sharp left for the sprint to the finish! Watch out for the mud on the inside of the final turn, and take advantage of the ramps on the straightaway. If you have Bananas, set them down in front of the ramps. You might catch other racers with them.

Time Trial Mode

Take the first turn as tight as possible. On Lap 1, collect at least one of the Coins.

The flight across the water should be not be dragged out more than necessary. Hit the beach ASAP and collect a Coin as you roll on through. Drift through the following turn as close to the rocks on the right as you can, making sure to pull off a Super Mini-Turbo before you take the next dash panel ramp across the water.

The big shortcut that was optional during the **Grand Prix** is essential here. Go into the water just to the left of red arrow sign, collecting a Coin in the process. Under the water, use a Mushroom to cross the dark patch of **terrain**, making sure that you don't fall into the chasm to the right of it. Ignore the Coins you see to the left!

As you exit the water, avoid any Sidesteppers that wander into your path, and aim to take the route between the pictured tree and the wall to the right to collect the Coin there. From here, you can either stick to the beach and collect a few Coins there, or you can drive through the shallow water for a more direct route towards the final portion of the course.

Another Coin can be found close to the exit of the beach, between another tree and the retaining wall on the right.

The run towards the final left turn has three more Coins you can collect. Afterwards, if you're still not at ten Coins in Lap 1, you have two more Coins you can collect as you Jump Boost from the ramps on the final straightaway. If you have ten Coins, avoid these ramps altogether.

Looking at the map, Toad's Turnpike doesn't seem like a very tough course to drive through. However, this multi-lane freeway is filled with all manner of vehicles, large and small, and its drivers don't exactly believe that **the racers** have the right of way.

Roadside Unassistance

Traffic: Consisting of small passenger cars, taxis, moving vans, and semis, the constant threat of traffic means that every lap on Toad's Turnpike rarely plays the same during the **Grand Prix**. It's not all bad news. Some cars have surfboards you can Jump Boost from, and some of the larger trucks have dash panels and glide ramps you can take flight from to fly over other large vehicles. The other big advantage here is that traffic follows a set pattern between laps. If you're going fast enough, generally you will have a good idea where certain vehicles will be on certain laps, and you can plan your routes accordingly!

Kart of Champions

Nintendo's Best Time Trial: 1:50.089

Player: Addison K.

Racer: Bowser

Body:
Sport
Bike

Wheels:
Slick

Glider:
Bowser
Kite

Grand Prix

There are two sections on Toad's Turnpike where you can ride the walls and use dash panels to pick up some good speed while collecting Coins. The big danger with these walls, besides **items** from rival racers, is jumping off them back onto the track. Occasionally, traffic might be in your way, and a crash can be very inconvenient to deal with!

As you race, keep an eye out for small outlets in the side of the road where rows of Coins are located. If you're out in front but have rivals close behind, you can deny them groups of Coins while maintaining your lead!

Item boxes on the road move with traffic, which can make getting equipped with something to attack and defend with difficult at times.

Watch for opportunities as you race to use dash panel ramp trucks to start gliding through the air. It's possible to land on top of some cargo trucks and Jump Boost off the ramps at the front of the cargo container. Just make sure you don't go flying into other vehicles, or off the track itself!

Occasionally, you'll encounter smaller vehicles with surfboards you can Jump Boost off of. As with the larger ramp trucks, watch where you're jumping to avoid an accident!

Depending on your Coin situation and your position in the race, rather than riding the walls when you can, you might want to stick to the ground to drift and Mini-Turbo as much as possible on the very inside lane of the course. This is technically faster, but can be very dangerous when traffic is factored in. Even the heaviest racers can pull this off with practice!

Time Trial Mode

You'll pass up some Coins on the left side of the track just as you start. Pass them up initially, and head straight for the first big turn. You can collect these later if you need them.

Riding the walls is deceptively fast! You'll actually save time by drifting and Mini-Turboing on the inside of every turn on this course. This means you'll have to squeeze between vehicles and the retaining wall, but it's worth it!

As you exit the first big turn, stay on the left side of the track to collect four more Coins. Then begin switching lanes to the right while maneuvering around traffic and avoiding turning so violently that you lose your forward momentum. The transition to the right side of the course should be smooth.

Watch for Coins as you're making your way to the right side of the course on this long straightaway. This is also a good place to use Mushrooms for that extra burst of speed.

You might be tempted by the Coins on the left side of the track as you head into the final turns. Ignore them and stick to the inside line. You can make up for missing the Coins by collecting the ones just past the start line.

Every turn should be taken as tight to the inside wall as possible. Ideally, you'll be drifting and Mini-Turboing during this. Traffic will complicate things over the course of three laps, but you'll have to deal with it if you want to post fast times on this course!

Using Traffic

It's difficult to say exactly where you'll be in relation to vehicles with ramps you can use during a **Time Trial**. It depends entirely on how fast you're going and the position of these ramp vehicles in relation to where you are on the course. Sometimes, it might be best to just drive past ramp vehicles. Other times you might find yourself in a position to exploit the glide ramps and multiple Jump Boosts. With practice, you'll be able to squeeze more seconds off every lap with a combination of precise drifting and smart use of Jump Boosts off ramps.

A different sort of fun in the sun, the Dry Dry Desert returns as a venue to the *Mario Kart* circuit. Some players may remember devastating whirlwinds that once populated the course during races, but you'll find that the air is much calmer this time around, and the desert is also wetter than before!

Roadside Unassistance

Sand Sinkhole: At roughly the halfway point through a lap, racers encounter a massive sinkhole that can swallow slower racers whole! A Mushroom can help boost players out of the pit. Those without should at best skirt the edges of the sinkhole. Even a Super Mini-Turbo will not be enough to save racers who get in too deep!

Pokeys: These living cacti stand tall on the track—until racers come close! Then they turn themselves into spiky arches on the track that can be safely driven through for the Coin that appears at their center... but it's still best to avoid risking an accident and drive around them. There's safer ways to collect Coins!

Falling Pillars: As you race through the course, pillars on the side of the track will collapse to the ground, turning into impromptu ramps to Jump Boost from. These can be beneficial—just be aware of where you're jumping to so that you don't go off road!

Kart of Champions			
Nintendo's Best Time Trial: 2:14.415			
Player: Jeff C. M.			
<div></div>			
Racer: Wario		Body: Sport Bike	Wheels: Cyber Slick Glider: Parafoil

Grand Prix

It's imperative that you get a good start on this course. **Items** are available only seconds out from the start line. If you're at the front of the pack going into the upcoming turns, you'll want to have something ready to defend yourself with!

On Lap 2, one of the stone pillars near the start of the lap will fall onto the track to become a ramp to use.

The five consecutive hairpin turns of this section are populated by Pokeys. You should be able to see where they are and adjust your racing line accordingly. If you have Mushrooms, you can cut across the sands off road as a shortcut. Watch for stone pillars to become ramps to help propel you across the off-road portions of the track during later laps!

The sand sinkhole has two thin roads lined with Coins going around it. You can drift and Mini-Turbo through those curves. Again, a Mushroom can help you cut across a portion of the sinkhole to save some time. Be careful about other racers and **items** in this section—it's surprisingly easy to get knocked into the sinkhole!

Another stone pillar will fall during this curve to the right. If you're still hurting for Coins, ignore this ramp and take the outside line.

The oasis has multiple water spouts that will launch you out of the water. They slow you down, but are useful for evading Green Shells. If you're trying to maintain speed, avoid the water spouts entirely. Jump Boost off the hill on the right side of the oasis, while skirting just to the left of the water spouts.

You can Jump Boost just as you exit the water on the other side of the oasis.

Over the course of your three laps, multiple stone pillars will fall alongside the final straightaway. You can cut the final right corner with a Mushroom.

Time Trial Mode

Don't miss the three Coins on the first turn. The upcoming hairpin turns feature a number of places to cut across the dark sands with a Mushroom, but this may not be as fast as a shortcut found closer to the end of the track!

It's vital that you collect at least four Coins when passing by the sinkhole during Lap 1. Both routes on either side have what you need.

Exiting the sinkhole zone, collect the three Coins to the left of the falling stone pillar.

There's a trick to getting through the oasis swiftly. Avoid the water spouts entirely, using the hill on the right side to Jump Boost. It's possible to Jump Boost off the hills while remaining in the water, to avoid slowing down when you crash back into the water. Don't miss the Jump Boost just as you leave the oasis.

The final right turn can be cut hard across the sands with a Mushroom, following the stone wall well inside rough ground.

Returning Classics

SNES Donut Plains 3

Returning from the original courses of the very first *Super Mario Kart*, Donut Plains 3 is a short and fast course. The ponds and grassy fields around the course can be exploited by a properly equipped and skilled racer for some fantastic shortcuts.

Roadside Unassistance

Monty Moles: The moles themselves are harmful to a racer, if they actually hit one. However, their molehills are an opportunity for Jump Boosts.

Cheep Cheeps: The waters at the center of the course are populated by some Cheep Cheeps. They usually will not get in your way, but keep your eyes peeled just in case.

Water Puddles: Barely noticeable aside from a reflection of the sky visible on the ground. When driving through wet portions of the track, your drifts will feel wider than usual.

Kart of Champions			
Nintendo's Best Time Trial: 1:24.754			
Player: Jeff C. M.			
<div></div>			
Racer: Morton		Body: Gold Standard	Wheels: Cyber Slick
		Glider: Cloud Glider	

Grand Prix

The first right turn, particularly during Lap 1, is vital to retrieve **items** from during a **Grand Prix**. If you don't get a good start, you'll likely miss out on **items** and be caught in the middle of the pack—and have a bit of a fight on your hands to break free.

When crossing this first bridge, don't fall into the water unless you have a Mushroom to push you through the other side, and even then there's a better use of it just across the bridge. While you can drive through the water, normally it's a slower route.

Staying on the road during Turn 2 can snag you some badly needed Coins. However, this turn can be cut very heavily by Mushrooming across the grass on the inside of the turn, past the retaining wall, and into the second pond.

Exiting the second pond and following the obvious route through the Item Boxes into the following series of curves is simple. However, this second pond is also the site of another major shortcut—one that does not require Mushrooms. Simply cut the corner while in the water, avoiding contact with the retaining wall on the left, and drive up out of the water. The correct exit angle will be marked by tire tracks on the hill, and you can Jump Boost off this makeshift ramp onto the track.

However you decide to navigate out of the second pond, don't miss the Coins on the next part of the course!

After a hairpin right over wet **terrain**, this straightaway is infested by Monty Moles. Jump Boost off their hills if they get in the way. If you have a Mushroom again at this point, you can aim for yet another shortcut through a gap in the retaining wall.

If the shortcut is out of the question, leaving the Monty Mole straightaway requires you to navigate two final hairpin turns before the last stretch. The **terrain** here is wet, so be prepared to compensate for that. This is also a good location to cut loose with Bananas or any shells you might have to complicate things for rivals behind you.

Time Trial Mode

After starting, cut Turn 1 as tight to the grass as possible, and cross the bridge.

There are four Coins you can safely collect on this turn during your first lap. However, it's better if you cut this first turn by using a Mushroom to cross the grass, blowing past the dividing wall and aiming for the next part of the pond. If you're aiming for the best time, there's a good possibility that you will not reach ten Coins during this **time trial**. You have to make up for this with excellent cornering.

You must take the shortcut route out of the second pond to make good times! The hardest part isn't cutting the turn, it's exiting the water at an angle that lets you collect Coins on the next stretch of road. You can be at up to eight Coins by this point.

The hairpin onto the Monty Mole straightaway has two more Coins to collect. Snagging them can be tough thanks to the wet **terrain**. Optimal laps down this stretch will have you taking advantage of Jump Boosts off the molehills.

The last two turns should be taken as tight on the inside line as possible. Ideally, the transition from the next-to-last turn to the very last turn should almost be a straight line drift from one apex to the next. The corner just before the final stretch does have some Coins you can collect on the inside line to help boost your total.

Returning Classics

N64 Royal Raceway

One of the longer courses in the game, Royal Raceway is not a particularly challenging course to race on. Racing well, however, demands that a driver exploits every single turn to the fullest. Unlike so many *Mario Kart* courses defined by special gimmicks and obstacles, this track can be defined by a distinct lack of them.

Roadside Unassistance

Piranha Plants: While not as aggressive as the variety that inhabits pipes, running into these guys on the sides of the track can be problematic. Don't let yourself stray that far off road.

Kart of Champions			
Nintendo's Best Time Trial: 2:04.626

Grand Prix

Coins and **items** are a precious resource on this track. With little in the way of natural obstacles to help defend against your rivals, your use of **items** requires timing, and it becomes important to deny every Coin to the enemy. Always look for groups of Coins, like these pictured on the first left turn, and collect them on every lap if possible.

Technically more of a **Time Trial** technique, hugging turns tight enough that your wheels drag across the red-and-white stripes on the roadside might be one of the things that keeps you ahead of your opponents, especially on higher difficulties. That said, seeding the inside of turns with Bananas can be a great tactic to handle anyone following you closely.

To the left of this curving section of track is a ramp with a dash panel on it. You need a Mushroom to reach it without tanking your speed first though. You can collect more **items** from the Item Boxes at the end of the ramp.

This uphill portion of the track has two dash panels and a glide ramp that will launch you across the lake to the other side of the track. More Coins can be collected from clusters in the air on the other side of the water.

The turns in this series all have chunks of grass that can be cut across with Mushrooms, if you have 'em. Otherwise, drift through the turns to try and score multiple Mini-Turbos. Watch for Coins scattered on the inside of each curve!

Time Trial Mode

Note

As with Toad's Turnpike, a **Time Trial** on Royal Raceway focuses heavily on getting the most out of every drift and every turn. There's multiple places throughout the course where a Mushroom could be considered useful, but the shortcuts here are not like the game changers seen in other courses, such as Donut Plains 3.

On this turn, you can afford to pass up the Coins and take the turn as tight to the inside as possible.

The hairpin turn after the first three Coins leads to another grouping of three Coins. Stay on the inside, and collect the lone Coin near the red and white markers.

Another trio of Coins can be found just before the ramp on the left-hand side of the course. You can collect two of these Coins during Lap 1, then burn a Mushroom to take the ramp and cut a portion of the course. However, this isn't necessarily efficient use of your **items**. Save them for later!

The turn leading towards the uphill jump has more Coins to collect, with a pair on the inside line being the ideal target.

As you approach the jump itself, four Coins, lined up in two rows, can be found. If you've done well on your first lap, this is where you'll have reached ten Coins.

Crossing the lake, you can collect from other groupings of Coins if you still need to reach ten on Lap 1. After you land from the glider flight, cut the upcoming left turn by Mushrooming across the grass, as close to the stone wall as you can get away with!

As you work your way through this series of curves, don't miss out on collecting the Coins while drifting and Mini-Turboing your way to the finish. As always, keep to the inside of the curves as best you can.

After fending off a maddened horde of Tikis, and driving off the Snowmads, Donkey Kong's island is once again a venue in the classic cups. Racers will be fighting the course as much as they'll be fighting each other as they tear through the jungle in search of victory!

Roadside Unassistance

DK Barrels: While Donkey Kong finds these barrels to be of great use in his games, in Mario Kart they help no one, slowing and stopping any racer not using a Mushroom or Super Star to blast through them.

Frogoons: These giant frogs hop across a section of the track, and can interfere with your racing.

Tiki Goons: Encountered early on, Tiki Goons slowly patrol across the track, and are large enough that avoiding all the Tiki Goons while trying to maintain a swift racing line can be a challenge.

Screaming Pillars: As you glide past these statues during the latter portion of the race, their screams generate gusts of wind that can slow you down.

Kart of Champions			
Nintendo's Best Time Trial: 2:14.917			
Player: Jeff C. M.			
   			
Racer: Wario	Body: Sport Bike	Wheels: Slick	Glider: Parafoil

Grand Prix

Soon after starting the race, you encounter a short split in the track. Tree roots have grown across the track and can be Jump Boosted for extra speed. Don't miss out on collecting Coins from either route!

Right after the split rejoins, a dash panel ramp sends you flying onto a bounce pad, which then sends you onto the next portion of the course. Don't miss out on triggering Jump Boosts on both the ramp and the bounce pad!

This stretch of the track is guarded by three Tiki Goons. You can defeat the Tiki Goons with various **items** if you have them at your disposal, but it's best to avoid the Tiki Goons entirely and save any **items** you have for other racers!

After crossing the bridge, you can choose to stick to the track and drift through the oncoming left turn, collecting Coins and avoiding the Frogoons on the road. Alternatively, if you cut this turn early and follow the stone ramp to the left of this part of the track, you can Jump Boost from a glide ramp and pick up some speed.

If you've chosen the path with the glide ramp, the upcoming three consecutive dash panel ramps can extend your flight if you properly Jump Boost from each ramp. However, it is somewhat easier to collect the Coins on these ramps if you aren't gliding.

Stick to the inside of this hairpin turn to continue collecting Coins. Don't forget to Jump Boost off the upcoming ramps! A particularly mean thing to do is to set Bananas on the upcoming glide ramp, as it gives other racers very little room to maneuver around them.

The Screaming Pillars blow large gusts of wind that can slow your progress across this chasm. Falling into the water far below is not a winning option, so try to make it to the track on the far side!

You have one last split in the track to negotiate. Following the main course on the upper path will take you through some additional Coins. However, the faster route is to cross the gap to the left of where you land from your glider flight. The short track here puts you on a straight line to the finish! Jump Boost off the ramps on this lower route to keep up your speed.

Time Trial Mode

When you get to the first split in the track, take the left side. It's a slightly more direct route to the dash panel ramp and bounce pad. Don't forget to collect a Coin here for each lap, and make sure to Jump Boost off the tree root and the upcoming jumps.

Stick to the left side of the track as best you can, drifting past the Tiki Goons. When you get to the bridge, collect two of the Coins. By Lap 3, no Coins should remain on this bridge!

You have a choice to make here: take the shortcut of the glide ramp, or stick to the ground level and collect the four Coins while avoiding the Frogoons. You can also try to cut this corner by using a Mushroom to cross the grass between the inside wall and the stone ramp. For the last of these options, trigger the Mushroom as you cross onto the grass to avoid launching into the air.

When crossing the multiple dash panel ramp jumps, you can collect two Coins during your first two laps, if you do this right. Jump Boost off every ramp!

The antigravity hairpin turn has two Coins you can pick up on the inside. Ideally you ought to be at seven Coins before you cross the Screaming Pillar chasm on your first lap.

While it hurts to not have ten Coins by the end of Lap 1, it's best to take the shortcut as soon as you land from the glider flight. Try to get a Mini-Turbo drifting across this shortcut, but you can also use a Mushroom here to keep up your speed.

Note

Unless you go out of your way to collect ten Coins in your first lap, you'll likely have to hit that goal during Lap 2. The time you'll save taking consistently faster racing lines through the course will make up for not being at your maximum as early as possible.

Returning Classics

DS Wario Stadium

Big hills, many dash panels, and massive jumps make Wario Stadium one of the most exciting courses in the whole game, fitting for its return to the *Mario Kart* circuit, and a proper opener to the **Leaf Cup**! Racers will have to do their best to nail every leap accurately to come out on top.

Roadside Unassistance

Fire Chains: A returning obstacle from Bowser's Castle, the fire chains make the races through Wario Stadium more exciting for the crowd... at the cost of being more dangerous to **the racers** themselves.

Kart of Champions			
Nintendo's Best Time Trial: 2:04.685			
Player: Jeff C. M.			
			
Racer: Wario	Body: Sport Bike	Wheels: Slick	Glider: Parafail

Grand Prix

Three sharp turns greet racers almost immediately beyond the start line, with only a small group of item boxes before you reach the first turn. Don't be surprised at the start of this **Grand Prix** that you struggle to break out of the pack early on while navigating the turns!

This first jump can trip up unprepared racers, as a sharp left turn awaits just as you land from it. Like with any jump on this course, it's a great place to use Bananas to trip up close pursuers.

The four small island ramps in the sea of mud here can all be Jump Boosted, allowing a racer to reach insane speeds before the upcoming left turn... but at the cost of control. Racers blitzing through this section will not have an easy time evading shells fired back at them, or missing Bananas placed on the ramps themselves.

These two large jumps have fireball rings just behind them. The jumps themselves are offset slightly, making it tough to hit both dash panels while keeping up your speed and avoiding the fire rings. You can really ruin a racer's day with a well-timed item attack here!

Watch the fire chains while making your way through this twisted section of the track. More danger comes as a ramp launches you off the mid-air section of the track back down to the ground level. If you're in a bad position here, you can miss the jump and fall out of bounds!

Another trio of dash panel ramp jumps await just beyond the antigravity section of the course. Once again, the dash panels here are offset from each other, making it difficult to hit every one as you pass through this section. As you go into the water here, you'll find two more ramps that can be Jump Boosted, though if you've carried enough speed in the previous section you'll skip at least one of them.

The final stretch begins with a glide ramp that sends you flying over a **body** of water standing between you and the finish line. If you have any **items** to foul up the ramp with, use them! Also, striking a racer in the air over the water can cost them many places if the competition is tight.

Time Trial Mode

Navigate the first three turns smoothly, taking the straightest line possible. On the last turn, don't miss the four Coins on the inside line as you approach the first jump.

Anticipate the hard left coming after the first jump. Stay on the inside line, making sure you collect at least one Coin from this ramp during Lap 1. Ideally you'll exit the turn aimed directly at the first of the four dash panel ramps coming up.

On an optimal run through this section, you'll Jump Boost from all four dash panel ramps, and during your first lap you'll collect two of the Coins placed here.

On the two big jumps, concentrate on hitting both dash panel ramps with Jump Boosts while evading the fire chains. You can collect a Coin just beyond the second ramp, but you might shoot past it if your speed is high enough.

Approaching the antigravity section of the track, you will see two lines of Coins: one with two Coins, and another with three. On Lap 1, take the three Coins, evade the fire chain just beyond them, and navigate the rest of the section with drifts and Mini-Turbos.

After Jump Boosting through the jump gauntlet, the final left turn is where you should use a Mushroom. On all three laps, you can cut across the mud on the inside of the turn, saving yourself some valuable time. Just make sure you make the turn and glide over the final water hazard!

Video is restricted

Returning Classics

GCN Sherbet Land

Sherbet Land has seen extensive changes from its original appearance back in *Mario Kart: Double Dash*, more than almost every other returning classic course. Racers can stick to the traditional routes on the surface of the course, or they can dive underneath the ice and race through previously unseen parts of the venue!

Roadside Unassistance

Skating Shy Guys: These graceful guys skate in groups across the ice parts of the track, pirouetting into the air and possibly plotting to sabotage their ice skating rivals' gold medal dreams.

Freezie: Sitting atop the ice, Freezies don't try to get in the way of the race, but there are enough of them on certain parts of the track than they can be an issue. Anyone who makes contact with a Freezie will be frozen for a short time. A mean trick is to set up Banana traps that will cause racers to crash into a Freezie.

Nintendo's Best Time Trial: 2:02.291Kart of Champions		
Nintendo's Best Time Trial: 2:02.291		
Player: Jeff C. M.		
		
Racer: Wario	Body: Sport Bike	Wheels: Slick Glider: Parafoil

Grand Prix

Just after the crossing the first line of Item Boxes, you have a choice of two paths to take. The first is to stay on the ice, hugging the hole in the ice as much as possible while you drift and Mini-Turbo around it towards the cave. Shy Guys skate through this area, trailing Coins to collect.

The other option is to drive off the ice through the warning cones on the right, driving through the water into a tunnel filled with dash panels. This route will deposit you farther into the cave, and you can snag some extra Coins this way.

The larger cave is split up at one point by a large ice pillar. If you have a Banana at this point, set it down among the Item Boxes. Both sides of the pillar are narrow enough that you have a good chance of catching other racers off guard.

The winding turns just outside of the cave take you through a very wide portion of the track, with plenty of Coins to collect. The large size of the track makes it tough to set up traps or fire shells back at opponents trailing you—there's just too much room to maneuver. Mushrooms can help you cut across the rough snow on the sides of the track.

As you exit the snowy portion of the track, you have three more options in the route you can take to the finish. The most immediately obvious is to drive through the road cones in front of another break in the ice and race underwater around pillars. Continue until you reach a hill that you can Jump Boost off of right in front of the finish line.

You can also take to the ice itself, driving around the breaks in the ice and avoiding the Freezies. This isn't the easiest route to take, nor is it the fastest, when you factor in the icy conditions. There's just a lot more room for bad accidents to happen, especially when **items** are part of the equation.

The last route requires a Mushroom, but it is the fastest and should always be taken if you're properly equipped. You'll be able to see Coins leading to the shortcut itself, and there's a glide ramp that allows you to fly over any Freezies covering the final straightaway to the finish line.

Time Trial Mode

Dropping below the ice for the five Coins in the dash panel tunnel is tempting. It's actually faster to stay on the ice, taking the turn as close to the hole as possible.

The first turn inside the cave has three Coins you can try and collect while drifting through. However, you might want to consider sticking to the inside of the track.

Hug the inside of this turn to snag another pair of Coins as you exit the cave.

As you exit the caves, the wide stretch of road has a number of Coins to collect. More importantly, you can cut the final right turn just before the ice with a Mushroom. As you do this, drift through the thick snow while hugging the wall, and then Super Mini-Turbo back onto the track. When you reach the ice, do NOT go under the ice to race through the water.

You can use a Mushroom to take this glide ramp shortcut across the snow and head straight for the finish line.

If you've already expended a Mushroom to take the shortcut described at point 4, stay on the ice, drifting and Mini-Turbo-ing as much as you can, taking the final series of curves as tight as possible.

Roadside Unassistance

 **Piano Keys:** Some of the tough turns on this track are over large piano keys. These “bumps” in the road can be Jump Boosted, but this can also be enough to send you off the track!

 **Piranha Plants:** Once again, Piranha Plants have decided to make themselves a huge nuisance, chomping to the beat as racers drive past them. Avoid the spotlights shining over these plants unless you have a Mushroom to slip past before the Piranha Plants take a bite out of you.

 **Bouncing Notes:** These enormous notes appear near the end of the course, bouncing to the rhythm and crushing any racers unlucky to be underneath them. You can Jump Boost if you jump at the same time the Bouncing Notes land on the track.

DS Tick-Tock Clock

Precise racers with an excellent sense of timing will be tough to beat on Tick-Tock Clock. Some of the best shortcuts are only available at certain points of the race, on specific laps, as the gears and clock hands keep turning regardless of what **the racers** are doing.

Roadside Unassistance

Moving Clock Hands: Clock hands stretch across portions of the course, becoming small ramps to Jump Boost off of, or bridges that span over pits. Unfortunately, these clock hands remain in motion during a race, and they may be more harm than help.

Gears: Massive gears make up a lengthy section of the course, and they switch the direction of their rotation on a fairly regular basis. If you're on these gears, try to drive in the direction they spin to avoid losing speed.

Clock Pendulums: While the pendulums move fairly slow, they are large enough that they can block a good portion of the course and force you to go out of your way to avoid them.

Kart of Champions			
Nintendo's Best Time Trial: 1:59.372			
Player: Jeff C. M.			
			
Racer: Wario	Body: Sport Bike	Wheels: Slick	Glider: Parafoil

Grand Prix

After the first turn, you come across a large clock-shaped portion of the course. The hands of the clock move throughout the course of the race, so you can't always expect to use them to cross the gap at the center of the clock. On the outer edges of this section are dash panels, Coins, and many Item Boxes.

When navigating past the pendulums, make sure you score Jump Boosts off the ramps, and try to collect Coins and **items** along the way.

The two glide ramps here alternate between being active and inactive. If you choose to glide, you can avoid dealing with the rotating gears in the next section, while collecting Coins in mid-air. Set Bananas on these ramps in hopes of tripping up the competition, if you can.

You'll eventually have to land on the gears, so make sure you land on the side of the gear that is pointed in the direction you want to go. If you ignore the glide ramps, or land early, you can maintain good speed by weaving around the central pillar of the gears, making sure you're always being helped forward. You can also score Jump Boosts off of the teeth of the gears.

The final turn leading to the finish has more clock hands that can help or hinder you. On Lap 1, if you're going fast enough, the long minute hand might be in place for you to use as a tough shortcut to navigate. Later laps will not afford you this luxury.

The final stretch uphill to the finish has a pair of gears on either side of the track. You can ride along the gears and Jump Boost off them, though you'll only benefit if the gear is rotating towards the finish line!

Time Trial Mode

On every lap after the first turn, you can collect at least one Coin as you Jump Boost over the hill ramp down towards the clock section.

On Lap 1, the clock hands are arranged in such a way that you can cross the center of the clock without falling into the abyss, if you're skilled enough. To get the most out of this shortcut will require you to Jump Boost off of the ramps on the sides of the clock, and at the center of the clock itself.

Later laps through this clock section are a good opportunity to collect Coins on the sides of the course, if you still need them.

After navigating past the pendulums, collecting another Coin in the process, you have to choose whether or not you want to glide into the rotating gears section. Don't miss out on collecting the Coins in front of the ramps.

With smart uses of drifting and Mini-Turbos, you can gain a surprising amount of speed by driving over the gears and Jump Boosting off their teeth. Just make sure they're rotating in the direction you want to go!

This last turn is a doozy. Thanks to the clock hands, you don't always have an easy way to cut the last corner over the gap. You can use a Mushroom and Jump Boost off the sides of the clock hands to bridge the gap, but this can get tricky as the **Time Trial** progresses.

Ignore the gears on the side of track as you sprint towards the finish line. Even if they're going the direction you want to, you lose some speed on contact with the gear itself.

Returning Classics

3DS Piranha Plant Slide

Arguably one of the fastest courses in **Lightning Cup**, the aptly named Piranha Plant Slide has racers tearing past the dangerous foes, following rushing currents of water through a sewer. Drivers will have to think fast and act faster to handle the sharp turns, Goombas, and Piranha Plants that dominate the track.

Roadside Unassistance

Piranha Plants: Two enormous Piranha Plants dominate impotrtant passages of this race course. Pay attention to what direction they are facing, and don't get close to that side of their pipe unless you're using a dash panel or a Mushroom to get past them.

Goombas: Once again, Goombas try to make nuisances of themselves on this course.

Water Currents: As you descend into the underground sections of this course, the water flowing through the sewer can grant you some extra speed. It can also put you in some sticky situations because of how fast you'll be moving. The water flows at the start of the course also take Item Boxes with them, so bear that in mind.

Water Jets: Near the end of a lap, you'll be racing underwater. Jets of water turn on and off throughout this section of the course, which can put you out of position while you navigate other hazards set down by your opponents.

Drain Pipes: Pipes dump water into a bottomless pit that you must glide away from. Getting caught in these waterfalls can send you plummeting into the darkness!

Kart of Champions			
Nintendo's Best Time Trial: 2:12.079			
Player: Jeff C. M.			
			
Racer: Wario	Body: Sport Bike	Wheels: Slick	Glider: Parafoil

Grand Prix

Right as you start, when driving down the curved slide, try to stay in the water rather than riding on the raised sections of the slide. You're pushed along by the currents while in the water. Don't miss Jump Boosting off the ramps as you enter the sewers!

When approaching the first Piranha Plant, pay attention to what side it is facing, and drive on the opposite side, staying in the water to keep up your speed. A mean trick here is to use **items** to force other racers to fall in range of the plant so it can bite them.

After slipping past the first Piranha Plant, the course takes a sharp left turn, through a small group of Goombas. You can avoid most of them by sticking to the inside of this turn, close to the wall.

As you clear the Goombas, you can try to jump onto a set of floating blocks to collect some Coins with the help of dash panel ramps. If you have Bananas, you can set them on these blocks to catch racers who try to follow you on to these narrow paths.

There's a lack of guardrails on the two turns leading up to the large pipe that takes you underwater. As you Jump Boost off the small pipe ramps, watch for opportunities to knock rivals off the track, while also keeping an eye out for them trying to do the same to you!

After the pipe sends you underwater, you're close to the second Piranha Plant. This guy has some serious range, so unless you have a Mushroom to boost past the side he's facing, or use the nearby dash panels, you don't want to be caught unawares by him!

The glide ramp at the end of the water section sends you flying upwards past a number of drain pipes. Do not touch the water flowing from them, as you'll likely not manage to make it to the landing site for your final run towards the finish.

This winding series of turns has Goombas and fake signs of Goombas waiting for you! Avoid the real baddies as best you can while negotiating the turns. You can use Mushrooms for a significant shortcut here, so if you manage to get one in the water section, hold on to it! Once you get through this final series of turns, the finish line is literally around the final corner!

Time Trial Mode

The general rule for the first part of this **Time Trial** is simple: stick to the water as much as you can to enjoy the boost from the water current. Also, take advantage of any ramps you encounter throughout for Jump Boosting purposes.

Slip past the first Piranha Plant, and aim for the ramp behind it so you can leap onto a smaller section of the track to collect three Coins. On the following laps, it's faster to drift and Mini-Turbo in the water currents on either side of the plant.

The turn just beyond the Piranha Plant should be cut as hard to the left as possible. Do this to avoid the Goombas and line up for one of the dash panel ramps that can launch you onto one of the floating block platforms, which contains some extra Coins.

Two small pipes on the ground in this section of the course have three Coins floating over them. It's tough, but try to collect the Coins and Jump Boost off these pipes!

The underwater section is straightforward for the most part. During the first two laps, it's easily possible to collect six Coins in one pass! As you approach the second Piranha Plant, stay to the right side of the track, and use the dash panel to blow past the baddie with no fuss at all.

After launching out of the water section back onto dry land, you're on your way to the spot where you'll want to use a Mushroom for all three laps. Launch yourself across the grass, through the pictured sign, while drifting hard to the left. By this point in Lap 1, you should already have ten Coins, so you can afford to miss a few here. Just make sure you hit this shortcut every time!

Video is restricted

Grumble Volcano pulls no punches. With every lap, the **terrain** changes as whole sections of the course collapse into the lava. The volcano itself spews flame that fouls up sections of the track, the road is uneven, and it's very easy to take a lava bath if you're not paying attention.

Roadside Unassistance

Fire Snakes: Hopping around on the track, these living flames are seemingly strategically placed to be in your way at the worst possible times.

Volcanic Activity: The titular Grumble Volcano erupts in the distance, sending lava flying onto the track. You don't want to be where that stuff lands!

Fire Patches: Lava spewed by the volcano leaves large patches of fire on the track, sometimes forcing you to pick a different racing line to avoid taking a hit.

Unstable **Terrain**: With every lap, sections of the course collapse into the lava. These changes will force you to drive down different routes. One of the major shortcuts only becomes available on Lap 3 because of this instability.

Kart of Champions

Nintendo's Best Time Trial: 2:10.129

Glider: Parafoil

Grand Prix

The section of road just after the race begins provides a basic example of how the track will change as the race progresses. Two of the Coins on the right side of the course will become unreachable when the land underneath them sinks into the lava on Lap 2.

The first turn inside the mountain starts out wide and easy to navigate. As the race progresses, huge chunks of the track break away, leaving you with much less room to drift through the turn. This turn becomes a hot spot for placing Bananas to send racers flying into the lava!

This platform moves back and forth in the lava. Concentrate on getting to the ground on the other side. The platform never moves enough that you will fall into the lava unless you make some serious driving mistakes.

The road splits up into upper and lower paths, following more or less the same turns. You can drop from the upper path down to the lower if you slip off the right side of the route. The lower route isn't decisively faster, but it is a bit easier to navigate.

The paths rejoin as you exit the cave, and another moving platform awaits you. On this platform is a glide ramp, an invaluable tool for reaching some more Coins caught in the air. This is another amazingly evil spot to set Bananas so you can send some rivals tumbling into the lava!

The road from the glide ramp platform splits twice for very brief periods. The upper routes have dash panels to make up for being longer to navigate, but you're generally faster on the ground. Watch out for fire patches on the ground, caused by the erupting volcano!

This tall mountain has two routes around it. The first is to climb up it, following the road to the left. Fire Snakes populate this narrow road, so be careful as you handle this turn. At the top of the mountain is a glide ramp that will send you on a straight line to the finish.

The right-hand route is faster, but more complex to navigate, requiring sharp turns to stay on the road while avoiding the rough **terrain** and the Fire Snakes on the path.

Things near the mountain change on Lap 3, with a portion of the course sinking away to reveal a small stone ramp. You MUST have a Mushroom available if you want to safely use that ramp to cut past the final turn for a more direct shot at the finish line.

Time Trial Mode

Collect one of the two Coins on the right side of the course just after you start. On later laps, the ground will have collapsed underneath them.

Remember that the first turns as you enter the cave will be more dangerous to navigate on later laps, when the ground has collapsed into the lava. Make sure to collect three Coins on the inside racing line during Lap 1. As you exit the turn, try to set yourself up to collect the two Coins on the moving platform before you enter the next part of the cave.

At the track split, stay on the lower level, and make sure you collect the three Coins on that path. You can score multiple Mini-Turbos during this long turn.

Exiting the caves, you can choose to glide over many of the most dangerous obstacles and collect more Coins in the process. If you've driven well on Lap 1, you can have ten Coins as you finish crossing these moving platforms.

The two raised portions of the track do contain dash panels to speed you along. The first of these raised portions can help cut down on your times. The second forces you to take a wider and longer path to reach it, and it's overall faster to stay on the ground level and drift through the turn as tight to the rough **terrain** as you can.

When you reach the final split in the track, take the right-hand route, and cut the final turns by going across the rough ground with a Mushroom.

On Lap 3, the **terrain** near the final turn on the right route will have changed to reveal a vital shortcut over the lava. Using this newly created ramp requires a Mushroom, so make sure you save one for it!

Returning Classics
N64 Rainbow Road

Mario Kart 64's classic **Rainbow Road** returns to Mario Kart 8! A course known by many for its incredible length compared to all others in its original appearance, **Rainbow Road** N64 is still one of the longest tracks in the game. Divided into three distinct sections, and having seen some significant changes from its original incarnation, this course is a colorful send-off to the **Lightning Cup**!

Roadside Unassistance

Chain Chomps: The enormous, unchained Chain Chomps bounce on sections of **Rainbow Road**, sending ripples throughout the track. You can Jump Boost off the crests of these ripples. Just be careful that you don't send yourself flying off the track, or directly into one of the Chain Chomps!

Make sure you go through all three star rings on the first downhill slope. When you get to the glide ramp at the bottom, fly through the two floating star rings.

A train full of Toads flies past this long, winding curve to the right, tossing Coins onto the track.

The Chain Chomp bouncing on the track causes it to ripple. You can Jump Boost off the crests of these rolling hills for extra speed—multiple times if the hill is rolling the direction you're traveling.

The second section of the course begins with a long, winding right turn that takes you up to a second rippling section of track, with two Chain Chomps making waves this time.

Not long after the third section of the course begins, you enter a series of consecutive turns, and with increasingly fewer guardrails to stop you from sliding off track if you slip up! Consider holding on to **items** that you acquire during these turns to use them for the final sprint to the finish.

The star ring dash panels here can be beneficial to use if you're drifting at the correct angles to hit them while avoiding flying off the course. This marks the beginning of the final straightaway in the course, with only one final glide ramp to launch you towards the finish line!

Time Trial Mode

Don't miss any of the star rings while going down the first hill.

You can't collect every single Coin that the train passengers throw onto the course during the first turn, but you can drive away with at least five Coins to your name while drifting through this section of the course. You can also use one of your three Mushrooms to exit this turn a little faster.

While Jump Boosting off the hills being made by the Chain Chomp, don't miss out on collecting Coins on the track just before you pass the Chain Chomp. They can blend in with the course, so pay attention! You can find more Coins on the second Chain Chomp section.

As you leave the Chain Chomps behind, the train flying next to the track will drop more Coins for you during a long left turn. Once you hit your max, you can afford to take any follow-up turns as tight as possible while ignoring extra Coins. The exit to this turn is another good spot to use one of your Mushrooms.

The final gauntlet of turns leading up to the final straightaway can be taken as tight to the inside as possible. In fact the only time you should drift to the outside of the track here is when you approach the last two dash panels before the glide ramp sends you to the finish. If you still have Mushrooms left at this point, the approach to the finish is your last chance to use them!

Battle Mode Introduction

Taking place on eight race courses encountered in the **Grand Prix** Cups, Battle Mode places twelve racers on track, either in teams or in one big free-for-all. Your goal is to pop the three balloons on every racer that isn't on your team, using **items**, the course **terrain**, or just straight up ramming your enemies as hard as possible to steal their balloons. You can drive anywhere on any of these courses, in any direction. Use that to your advantage to set up ambushes on your rivals.

The concept is very simple, but actually getting it done is quite the challenge. As with other **game modes**, Battle Mode can be played offline with up to four players on one Wii U, or online with twelve players.

Battle Mode Settings

Before a match begins, you have the ability to change the rules of the battlefield. The settings you can adjust are listed here.

- Teams or No Teams
- **Items**: All **Items**, Shells Only, Bananas Only, Mushrooms Only, Bob-ombs Only, and Frantic Mode
- **Time Limit**: 1 to 5 Minutes
- **COM (COM Racer Difficulty)**: Easy, Normal, Hard
- **COM Vehicles**: All Vehicles, Karts Only, Bikes Only
- **Courses**: Choose, In Order, Random
- **Round Count**: 3, 4, 5, 8, 12, 16, or 32 battles

Battle Mode

Wii Moo Moo Meadows

The cows grazing in the fields in one section of this course can be a bit of a problem as they slowly make their rounds, blocking **items** and racers alike. Be careful about setting yourself up on the off-road portions of the track, as without a Mushroom you're stuck going quite slow.

Battle Mode GCN Dry Dry Desert

Most of Dry Dry Desert is dangerously wide open, making it easy for racers to find and attack their opponents. You also must still contend with Pokeys, and the massive sand trap in the middle of the course. This all changes in the oasis, where the combination of water, water spouts, and the large hills popping up out of the water throughout the oasis gives you some ways to evade your enemies and their attacks.

Battle Mode

SNES Donut Plains 3

Much of Donut Plains 3 is wide open, but large parts of the course are cut off from each other by lengthy retaining walls, which gives Green Shells plenty of things to bounce off of. This course provides two bodies of water that racers can hide in to try and ambush other competitors. Just be careful about sticking around these confined spaces when the Green Shells start to fly!

Battle Mode

N64 Toads Turnpike

Traffic is the greatest threat here, making it almost impossible to guarantee successful attacks on other racers without being much closer to them than usual. During **Battle Mode**, traffic on Toad's Turnpike travels in both directions. Look out for racers lurking in between cars!

The walls here are good for escaping the chaos on the roads, but you're not much safer on the walls if someone follows you! The two wall sections are small enough to be very problematic if **items** are cut loose there.

PRIMA
GAMES

Battle Mode Mario Circuit

There's not very many places to hide on **Mario Circuit**, so speed is the name of the game! You'll have to move fast to get to Item Boxes before your opponents do. Watch out for Goombas wandering on the track, and for Piranha Plants infesting the pipes next to the final turn towards the finish line.

Battle Mode Toad Harbor

One of the most complex racetracks to battle on, **Toad Harbor** features very distinct locations. The market just beyond the bridge near the start line can be the site of many ambushes from above, and features many obstacles that can block attacks. Watch out for trolleys rolling down the final hill near the finish, as they can also interfere with your **items** and your driving.

Battle Mode GCN Sherbet Land

The ice and snow of Sherbet Land can make for a slippery and wild battle! Watch out for the Shy Guys skating on the ice, and the Freezies near the finish. Large sections of the course are wide enough that traps with Bananas are fairly ineffective, but in the underwater portions of the course, you can set up good ambushes in those confined spaces.

PRIMA
GAMES

Battle Mode N64 Yoshi Valley

The maze-like opening section of Yoshi Valley is where most of the intense fighting is going to take place. Remember, since you can drive any direction you want to, there's a lot of cat-and-mouse-style fighting that can go on throughout the valley. Take advantage of the large cannon in one part of the maze to escape the wrath of any racers armed with Red Shells!

Additional Game Modes

Mario Kart 8 has a number of special modes that can be accessed from the main menu. These additional **game modes** build upon the standard **Grand Prix** and **Battle Mode** setups, either by allowing you to customize the rules and settings of the game, or allowing you to play with other racers!

Multiplayer

Up to four players can play *Mario Kart 8* together on one Wii U. You can play **Grand Prix** or **Battle Mode**, or you can create a VS Race tournament that matches the preferences of the group. Players can choose their preferred control method, and leave the GamePad in front of the group to act as a shared map.

VS Race

VS Race allows players to adjust the settings of the game to fit special preferences. With these settings, you can create your own customized **Grand Prix** tournament!

- Teams or No Teams
- **Items:** All **Items**, Shells Only, Bananas Only, Mushrooms Only, Bob-ombs Only, No **Items**, No **Items** or Coins, and Frantic Mode
- **Class:** 50cc, 100cc, 150cc, Mirror
- **COM (COM Racer Difficulty):** Easy, Normal, Hard
- **COM Vehicles:** All Vehicles, Karts Only, Bikes Only
- **Courses:** Choose, In Order, Random
- **Match Count:** 3, 4, 5, 8, 12, 16, or 32 races

Online

Online racing continues to be part of the *Mario Kart* formula! Going online alone, or with a buddy for some split-screen action, you can test your skills in individual races or online tournaments. You can also share your highlight reels, compare your **Time Trial** runs, and even download course ghosts from the 'net. Up to twelve players can join a lobby and race or battle against each other!

Online Modes

It is possible to play standard **Grand Prix**-style races or **Battle Mode** while playing online. You can choose to filter who you play with by selecting one of four menu options.

- **Worldwide:** This lets you play online with anyone from any region of the world!
- **Regional:** You will limit your opponents to those who come from the same region as you do.
- **Friends:** This limits your rivals to those you've added to your friend list, or players you have recently played with.
- **Tournaments:** This setting allows you to participate in tournaments against other players online.

Racers earn or lose race points based on what place they land in by the end of a race. You can use this stat to see the sort of opponents you're up against!

Online Tournaments

Tournaments are a series of races that follow a rule set created by the player who started the tournament. It is similar in function to VS Race mode, but an online tournament can also follow a specific schedule. If you want to race only on Tuesdays at 1:00 AM, go for it!

Players can set up and run up to four tournaments simultaneously. A tournament is ranked based on the point totals of all the players who are participating, and this can be used to judge what sort of competition you can expect. If a tournament is closed, you can still race against other participants of the tournament, but it will only count as practice, and your points will not contribute to the tournament ranking.

Secrets

Mario Kart 8 has a number of secrets awarded to players who accomplish special feats over the course of regular gameplay.

Ending

Beating the Special or Lightning Cups in third place or better on 150cc will let you watch the standard ending credits to *Mario Kart 8*. This can be done while playing in Multiplayer offline, so long as one player meets this requirement.

True Ending and Title Screen Change

Finish first in all cups on 150cc and you unlock the true ending credits, and a new title screen!

Gold Wii Wheel

You are awarded the Gold Wii Wheel by using Motion Controls in 50% or more of your last 100 races. Good luck...

Secrets
Stamp Collection

Miiiverse posts can be decorated with *Mario Kart 8*-themed stamps! In addition to the twenty-eight stamps the game starts you off with, you can unlock more stamps by accomplishing things within the game. Thirty stamps are unlocked by taking first place in a cup with a given character. Another thirty-two require you to defeat the first Developer Ghost on each track in **Time Trial** mode. That means you can have up to ninety *Mario Kart 8* stamps to use for your **Miiiverse** posts!
